

AP 3D Art and Design (B6531)

Recommended prerequisite: 10th-12th grades

Meets SDUHSD Graduation requirement: Visual or Performing Art/Elective

Meets CSU/UC A-G requirement: F- Visual & Performing Arts

AP Art Studio: 3D is a course that prepares you for building a portfolio. This is a very rigorous course that demands hard work and follow through, but what you will walk away with is something you can be very proud of and use it to show potential colleges, clients, and/or galleries. In 3D you will develop your skills in a three-dimensional medium such as ceramics, found objects, and other sculptural materials as you learn the principles of 3-D design. You will explore materials, processes, and ideas that artists use while you create artwork that reflects your own ideas, skills, and what you've learned.
