Hi 4Ri Families!

I hope everyone had a great week! 😊

Here is a glimpse at what we did this week:

- Science-How can animals use their senses to communicate?
 - We focused on eyes, and how the pupil might get larger depending on if the animal is nocturnal. We started discussing a few of the other senses-ask your child about the octopus, snake, caracal :)
- Writing
 - We started generating entries in our notebooks about personal stories-with the possibility that one of the entries might be the one that is picked to take through the writing process.
- Reading
 - We read a new picture book called The Big Red Lollipop. We started discussing the importance of story elements and how one part of a story connects/fits with another.
- Math
 - We finished our Place Value Unit. Everyone took an assessment on Wednesday. Those will be coming home next week. Everyone worked really hard! We talked about why assessments are given and how they come in different forms.
 - [Unit 3 Family Letter](#)

Have a wonderful weekend!
