

The Google Site Project

1. Log in to your Google account
2. Then go to site.google.com and then click Create
3. You are to create a Google Site on a topic that is of interest to you
4. You have six classes to work on the site so whatever you do make sure that the work that you do is interesting, useful and informative. Your goal is to make the best site on the Internet about your chosen topic.
5. Take a look at the [Rubric](#) that will be used to grade your project
6. You may choose from historical, computer, science, history, math or educational field but the project has to be educational. I encourage you to pick a science project that can be expanded into a Science Fair Project. Most of your science teachers are going to require you to do a Science Fair Project and this can be the start of a real good one. This [link](#) may give you some ideas.
7. You need to embed at least one forms in your project (probably a test about your project - make sure you have all good questions)

8. You will need to link to at least one Presentation that you created for your assignment or to a ScreenR recording (or you can use both)

How to Embed Forms on Google Sites

1. Create the form. Click the Send button. Then click the Embed Button. Copy the Iframe.
2. Go to your Google site and create a new page. Title it Egyptian Quiz, Feedback Form or whatever your page is going to be about.
3. Click the pencil to edit the page. Click the <HTML> option above. Paste your Iframe in to the HTML window.
4. Update and Save
