

Facilitate a Professional Learning Network Session

Description

Like anything that is new... people need more time to dive deep and pose their questions. Facilitate a professional learning opportunity such as a Lunch and Learn or After School Session where educators can further explore the elements or global competencies.

Minds-on

A great place to start your planning is to reflect on when you were new to the concepts of Deep Learning and all the questions that you may have had. Use [this graphic organizer](#) to plan the key ideas that you would like to address.

Action

Speak with your school administrator to select a date and then send out the invitation. Continue to prepare your session while remembering that educators like practical ideas and time to discuss concepts. Perhaps you would like to ask your colleagues to provide you with feedback about the session and pose any remaining questions.

Consolidation

Reflect on your session, do you feel that you meet the needs of the participants? Were you able to respond to their questions?

Share your Learning

It's time to share your learning journey with others. Please submit the [Google Form](#) to claim your badge. Tweet out a picture of your classroom invite, the resources you created to collect feedback or maybe a reflection on the whole experience. Please remember to use the hashtag #ocsbdl
