

# Implementing Blended Learning at Your School or District

## MTDA-EdReady Montana

---

### Classrooms

EdReady is used by educators to identify and fill gaps. A combination of our online program and direct instruction completes the blended learning loop.

### Test Prep Programs

Schools in Montana use EdReady to prepare students for national standardized tests, state tests, college entrance exams, HiSet, and school level assessments.

### Supplemental Programs

Educators in Montana utilize EdReady to front load information for students or as a way to reteach concepts personalized to each student's need.

### Bridge Programs

From middle school to high school to college, Montana schools use EdReady to individualize pathways to the next level of math/English by allowing access to our program outside school time and/or during the summer months.

### Doing Placement Differently

The two Montana flagship universities as well as several state colleges have adopted EdReady Montana as their formal placement for incoming students in math and/or writing placement.
