

Bakare Abiola

I'm a Software Engineer with rich development experience in building and delivering great ideas into digital products.

EXPERIENCE

KingCards - Frontend Engineer

March 2022 - Present

- Responsible for re-writing the React application created using Create React App to use the more mature React framework Nextjs.
- Reworked the authentication layer to be more secure by avoiding the storage of API tokens in localStorage.

Freelance - Full stack Engineer

2018 - present

I help bring various clients' visions into reality through seamless process and on time delivery.

HNGX internship - Backend Engineer

November 2023 - December 2023

- One of the team leads that created the Zuri digital marketplace.

HNG9 internship - DevOps

November 2022 - December 2022

- Led my team as DevOps lead in the collaborative ideation and development of a kitchen diary application.
- Built and deployed dockerized microservices applications on DigitalOcean with a CI/CD pipeline using Jenkins.

Deyenok Nigeria Ltd - Full stack Engineer

JAN 2014 - OCT 2014 • Lagos, Nigeria • full-time

I built a payroll management system which works as a stand alone app but reports generated could be exported to external storage sources .

Stack: C#.NET, WPF, MSSQL
