September 10, 2025

Dear MTSD Staff and Parents/Guardians,

I am writing to share some important news from the New Jersey Department of Education (NJDOE). The NJDOE has launched a new School Performance Reports webpage that makes it easier than ever for families and community members to access information about our schools.

On this new site, you will find:

- **PDF Reports:** School Performance Reports are available for the 2016–2017 through 2023–2024 school years. You can search by school or district name, or select a state-level report.
- **New Dashboards (2023–2024 only):** A summary report dashboard has been added this year that includes all the data from the previously released summary reports along with other key data points. These dashboards provide an easier way to navigate school, district, and state-level performance.

Please note that in the PDF reports for prior years, some links may no longer work since they direct back to the old website.

We encourage you to explore these reports to gain insight into the progress and performance of our schools. This transparency supports our ongoing efforts to work together in ensuring the best possible outcomes for all students.

You can access the new webpage and reports by clicking here: [School Performance Reports](#)

Thank you for your continued partnership and commitment to our schools.

Sincerely,

Tiffany J. Moutis, Superintendent
