

After the death of his beloved grandfather, Cooper Cameron invents rituals to cope with his fear that something else bad will happen. But as his OCD behavior affects his family, Cooper's determined to cure himself by journaling his observations. (Amazon Summary)

Mrs. Petrin's Review

Cooper Cameron has OCD and protects himself and his family by counting in three's and by washing. When his family goes back to the site of his beloved grandfather's death, Cooper is forced to confront many of his fears head-on. How he does so is remarkable.

This is a beautiful novel of empowerment and of not being afraid to be oneself while finding the courage to heal.
