Module Description: Community Nursing (21R01410903)

Module designation	Course Module
Semester(s) in which the module is taught	IX
Person responsible for the module	Wa Ode Nur Isnah Sabriyati, S.Kep., Ns., M.Kes. (Koordinator) Andi Msyitha Irwan, S.Kep., Ns., MAN., Ph.D Arnis Purpitha R, S.Kep., Ns., M.Kes Framita, S.Kep., Ns., MSc Kusrini S. Kadar, S.Kp., MN., PhD Nurhaya Nurdin, S.Kep., Ns. MN., MPH Silvia Malasari, S.Kep., Ns., MN Syahrul, S.Kep., Ns., M.Kes., Ph.D
Language	Bilingual, Bahasa Indonesia and English
Relation to Curriculum	This course is a compulsory course and offered in the 9 th semester.
Teaching Methods	Teaching methods used in this course are: - Community Side Teaching (CST) - Pre-post conference - Reflective study - One-Minute Preceptorship (OMP) - Case Based Discussion. The class size for lecture is approximately 50-100 students, while for Project Based learning is about 7-10 students for each group.
Workload (incl. contact hours, self-study hours)	Contact hours for practice are 160 hours. For this course, students are required to meet a minimum of 181,33 hours in one semester, which consist of: 160 hours (equals with 5.33 ECTS) for practice.
Credit points	3 credit points (equivalent with 5.33 ECTS)
Required and recommended prerequisites for joining the module	Students must have graduated with Bachelor Science in Nursing (BSN) and must have passed the Fundamental of Nursing Practice, Medical Surgical Nursing, Materninty Nursing, Paediatric Nursing, Emergency Nursing Practice, Critical Care Nursing Practice, Psychiatric and Mental Health Nursing Practice, and Nursing Management Practice.
Module objectives/intended learning outcomes	After completing the course and given with a maternity nursing case, students will be: Attitude CLO1: Able to provide community care with cultural sensitivity and respect for ethics, religion, and other factors as well as legal aspects in community nursing.(A) Competence CLO2: Apply comprehensive community nursing services. (C1) CLO3: Able to communicate effectively in interpersonal relationships within the community.(C2) CLO4: Implement community nursing care through cross-program, cross-sector, and community group collaboration.(C3) CLO5: Students are able to apply research results in an effort to improve the quality of community nursing services.(C4)

improving professional competence in community nursing.(C5) Students will learn about: Make effective communication in providing nursing care to communities. Using effective interpersonal skills in teamwork. Use health technology and information effectively and responsibly. Using the nursing process in solving problems related to individuals, families, groups and communities. Cooperate with related elements in the community Use ethical and legal decision-making steps. Providing cultural sensitive care by respecting ethnicity, religion or other factors Collaborate on various aspects in meeting the health needs or individuals and families in community. Demonstrate nursing technical skills in accordance with applicable standards or creatively and innovatively so that the services provided are efficient and effective. Nursing care on aggregate in the Community: School health Nursing care on aggregates in the Community: Child and Adolescent Health Nursing care on aggregates in the Community: Women's and Men's Health Nursing care on aggregates in the Community: wulnerable populations: Mental Disability, Disability, and abandoned populations		CLO6: Students are able to develop their potential related to

Example of Written Test Exam

The number of suspected cases of measles in the slum areas assisted by the health center is 32 cases. There were no deaths, 6 suspected cases were treated. Posyandu and immunization did not work because the community was not present. The results of the interviews showed that the people objected to the side effects of the vaccine. Based on observations, people go to health services only if the disease is severe. What is the most appropriate nursing problem in this scenario? (CLO2)

- A. Community health deficit
- B. Community coping is not effective
- C. Health management is ineffective
- D. Health care is ineffective
- E. Health behavior tends to be risky
