  - If your name is not on this list (but should be), your email is incorrectly listed, or you have multiple emails on the list please reach out to both Tracy Kuhrt (tkuhrt@linuxfoundation.org) & Todd Benzies (tbenzies@linuxfoundation.org)
- [approved addition for 2017 election] That in addition to collecting the GitHub/Gerrit committer data for the preceding 12 months and the list of project Maintainers for each repository, that we also include the list of WG Chairs and collect from each a list of individual "WG Contributors." There should also be a dispute resolution process where an individual who believes they should be included (but was not) can appeal to the WG Chair and Hyperledger Technical Advocate(s) with the final determination left to Hyperledger staff.

Per the Charter

Steady State: After the Startup Period, there shall be a nomination and election period for electing Contributors or Maintainers to the TSC. The TSC voting members shall consist of eleven (11) elected Contributors or Maintainers chosen by the Active

Contributors. An Active Contributor is defined as any Contributor who has had a contribution accepted into the codebase during the prior twelve (12) months. The TSC shall approve the process and timing for nominations and elections held on an annual basis.

Contributors: anyone in the technical community that contributes code, documentation or other technical artifacts to the HLP codebase.

Maintainers: Contributors who have the ability to commit code and contributions to a project's main branch on an HLP project. A Contributor may become a Maintainer by a majority approval of the existing Maintainers.
