

Group Notes

23 participants at peak

Agenda: <https://github.com/Islandora/islandora-community/wiki/February-28>

Slide with links:  February Open Meeting

Icebreaker Jamboard:

https://jamboard.google.com/d/14QKBIQ-_4gUbiZA1tV57ocswPzeHEw_fCwzYT3g5ysk/viewer?f=0

- Islandora Camp
 - Information: <https://github.com/Islandora/islandora-community/wiki/IslandoraCamp-2023>
 - Tickets: www.eventbrite.ca/e/islandora-camp-2023-tickets-463658012597
- IslandoraCon
 - <https://2023.islandora.ca/>
- Starter Site Updates
 - Taxonomy Demo and merging terms
 - Under Linked Agents, added links to create terms needed prior to linking
 - Citation creation
 - Working on advanced search
 - Working on MODS display
 - Working on according view of newspaper
 - Looking forward: a sprint when IR and metadata interest groups are ready, and a community best practice
- <https://github.com/Islandora/islandora-community/wiki>
 - Information to get onto the Slack
- Migration Coffee Talk
 - A place to share some migration info:  Migration-7-to-2
 - Trico using workbench and it's been pretty smooth!
 - Preserving 7x urls?
 - Whitman
 - Florida uses a perl system, will be carrying those over
 - Integrating into 2
 - DGI thinking about path auto everything, also apache-level redirects
 - Trico saving the PID and generating them; new objects without: they are generating based on nodeId; also some fake PIDS when needed
 - DOI resolution? Resolve to new url? Don't have a plan for mapping a new id to new object; have DOI be part of url?
 - Noid (sp?) minter at ASU?
 - Cutover to 2: what is the messaging on the migration? How do you describe this to your communities?
 - Whitman did theirs over spring break, pointed out some differences, but for the most part the user exp was similar. Wasn't as major as doing a new ILS. They put together a LibGuide for things like the placement of the login button. Also went out to faculty listserv
 - Using isle-dc to run migrated sites in production?

- FL doing so bc they ran into trouble with ansible; seemed to be the easiest
 - Whitman yes, bc of Born-Digital
 - Solution pack for oral histories for 8/2?
 - As of now, no current feature for 2. Some using compound or collections
 - Born-digital
 - If your transcript is time stamped with VTT, you can subtitle it
 - <https://github.com/Islandora/documentation/blob/9bab170c5032d7d12125f881e89356f838bef93b/docs/user-documentation/transcripts.md>
 - <https://www.oralhistoryonline.org/>
 - <https://www.drupal.org/project/ableplayer>
 - Documentation is important too, work into the starter site
 - Other options for leveraging drupal?
 -
 - Modules that make the migration successful?
 - Taxonomy manager
 - Metatag model
 - O-embed
 - Riprap
 - Slideshow
 - Preservation is important for FL
 - Trico using Fedora, preservation important too
 - Seeking redundancy in other home-grown solution, not relying solely on I2
 - Pro-tips on using workbench?
 - Always check the log files!
 - Errors, crashes Apache, maybe memory?
 - Things that attach themselves to php will still run (threads?), in a batch context it may try to index and crash
 - Disable solr as a way to stop it
 - <https://github.com/arnaud-lb/php-memory-profiler>
 - Rollback feature in workbench config file
 - Not using Workbench?
 - FL need to do some metadata remediation; do a data snapshot; but what have others done?
 - Anyone using an XML-based migration?
 - DGI using foxml as baseline and x-pathing into Drupal fields (becoming open source on this)
 - Islandora failing on rebuild?
 - Only on permissions? Error message doesn't always line up to actual issue; have to dig around?
 -
- Open Q & A
 - Bootstrap Barrio & themes
 - <https://github.com/Islandora/documentation/issues/1427>
 - https://github.com/jhu-idc/idc_ui_theme_boots

Sarah Goldstein to Everyone 12:07 PM

Is it possible to make bubble tea at home these days???

Rebel Cummings-Sauls to Everyone 12:07 PM

Internet slow here with weather, Do the Dew!

You to Everyone 12:08 PM

delivery 😊

Alexander O'Neill to Everyone 12:08 PM

I have boba tea ice cream bars in my fridge I can boil some water and get back to you

Sarah Goldstein to Everyone 12:08 PM

Nice!

Jess Colati (she/her) to Everyone 12:08 PM

GenZers do it all the time here LOL

You to Everyone 12:09 PM

Islandora Camp Information:

<https://github.com/Islandora/islandora-community/wiki/IslandoraCamp-2023>

Islandora Camp Tickets: www.eventbrite.ca/e/islandora-camp-2023-tickets-463658012597

<https://2023.islandora.ca/>

Michial Trayler to Everyone 12:16 PM

Michial Trayler here. New to the call. Just listening to learn.

Amy Blau to Everyone 12:17 PM

Welcome!

Rosie Le Faive to Everyone 12:24 PM

and re: bubble tea, i've had this and it was good:

<https://haisue.ca/product/j-way-brown-sugar-boba-milk-tea-set-468g/>

You to Everyone 12:25 PM

Rosie, I am bookmarking this and looking into it immediately!

Rebel Cummings-Sauls to Everyone 12:27 PM

My internet is just slow

Rebel Cummings-Sauls to Everyone 12:27 PM

Yes

Alexander O'Neill to Everyone 12:27 PM

A good way to think of the starter site is a collection of how things are done that you can copy if you've already got a site going

Rebel Cummings-Sauls to Everyone 12:28 PM

I think that clarification is good

Goran Ivaz to Everyone 12:28 PM

What options do we have for migrating Drupal 7/Islandora 7 content to the current Drupal 9/Islandora 2 platform ?

You to Everyone 12:29 PM

Information to get onto the Slack is here:

<https://github.com/Islandora/islandora-community/wiki>

Rebel Cummings-Sauls to Everyone 12:29 PM

https://docs.google.com/document/d/1m2h37V_qW5r3nkK_5qfysD4ZJMR7w0ljKM0vB3d7Blc/edit?usp=drivesdk

If you want to share resources on this topic

Rebel Cummings-Sauls to Everyone 12:31 PM

That would be great!

Amy Blau to Everyone 12:31 PM

Goran: Islandora Foundation documentation is here:

<https://islandora.github.io/documentation/technical-documentation/migration-overview/>

Goran Ivaz to Everyone 12:31 PM

What options do we have for migrating Drupal 7/Islandora 7 content to the current Drupal 9/Islandora 2 platform ?

OK. Thanks

Alexander O'Neill to Everyone 12:32 PM

Question for the romo, we've talked before about various ways to preserve Islandora 7.x URLs , has anyone implemented this, and how do you handle newly-created objects without PIDs?

Goran Ivaz to Everyone 12:32 PM

Looks like things change faster than the documentation :-)

Amy Blau to Everyone 12:34 PM

LYRASIS Migration toolkit includes one migration path for Islandora using Workbench:

<https://wiki.lyrasis.org/display/FF/Fedora+Migration+Paths+and+Tools>

Rebel Cummings-Sauls to Everyone 12:36 PM

We are using node ID too

Seemed easier to use System generated info

We aren't minting doi, makes sense to use that

Jordan Dukart to Everyone 12:39 PM

If you're implementing DOIs look at https://github.com/discoverygarden/dgi_actions
/shamelessplug @alexander

Jim Borwick to Everyone 12:41 PM

Are folks using isle-dc to run migrated sites in production?

Rebel Cummings-Sauls to Everyone 12:41 PM

As long as your indexing is happening correctly, about 70% access directly to content so they won't even notice

Everett Vincent to Everyone 12:42 PM

Hi, I am working on our migration at the University of Waterloo. I enabled the Oral History solution pack in Islandora 7. I was wondering if this solution pack will be in Islandora 8?

Alexander O'Neill to Everyone 12:42 PM

That looks good @Jordan

Rebel Cummings-Sauls to Everyone 12:43 PM

Oral history solution pack, not that I know of now but possibly

We plan to use compound or collections

Any other content people are seeking solutions for content types? Like Serials

Everett Vincent to Everyone 12:46 PM

thank you.

Jordan Dukart to Everyone 12:48 PM

Documentation that Rosie wrote:

<https://github.com/Islandora/documentation/blob/9bab170c5032d7d12125f881e89356f838bef93b/docs/user-documentation/transcripts.md>

Rosie Le Faive to Everyone 12:48 PM

<https://www.oralhistoryonline.org/>

Annie Oelschlager to Everyone 12:48 PM

<https://www.drupal.org/project/ableplayer>

Michial Trayler to Everyone 12:49 PM

Thanks all. I have to drop for another meeting coming up.

Jim Borwick to Everyone 12:50 PM

Are there actions that create derivatives and then send the base tiff into the specified private file system? I couldn't find any and it seemed like this would have been helpful in cases where we wanted a thumbnail to appear in search results but other derivatives sent to private files. Also will Drupal 7 be extended past Nov. 30?

Rosie Le Faive to Everyone 12:51 PM

"then send the base tiff" — you mean move the original, after the fact?

Jim Borwick to Everyone 12:51 PM

Rosie, yes

move the original after the fact.

wondering if there are modules that support that

Rebel Cummings-Sauls to Everyone 12:52 PM

What modules are you adding to make your migration successful?

Jim Borwick to Everyone 12:54 PM

Taxonomy Manager has been helpful for us

Jordan Dukart to Everyone 12:54 PM

@Jim, can't find anything officially mentioned beyond they are going to announce by July if they are going to extend it. I think internally we've had some communication from long term support partners that expect it to get extended if that helps.

Jim Borwick 12:55 PM

Thanks @Jordan

Goran Ivaz to Everyone 12:59 PM

+1 for that question ..(workbench)

Emily Higgs to Everyone 12:59 PM

I'm running to another meeting, thanks all!

Everett Vincent to Everyone 12:59 PM

I was wondering if many people are planning on using Isle-Dc, or are currently using it to migrate to?

Rebel Cummings-Sauls 1:01 PM

We are doing Isle, JHU is on Isle, there us an Isle Slack channel

Everett Vincent 1:02 PM

ok. thanks Rebel.

Jordan Dukart to Everyone 1:02 PM

If you really are introduced <https://github.com/arnaud-lb/php-memory-profiler> is a neat tool.
interested* Rosie

Rebel Cummings-Sauls to Everyone 1:03 PM

We want to go not Workbench route for migration

Anyone else doing this or went this way?

Rebel Cummings-Sauls to Everyone 1:11 PM

Can't say for sure, we had a random failure and can't get to the root right now

php Error Symfony\Component\Routing\Exception\InvalidParameterException: Parameter "block_id" for route "context.reaction.blocks.block_edit" must match "[^/]+" (" " given) to
generate a correspondin

Annie Oelschlager to Everyone 1:13 PM

There is a patch Danny made for that on Drupal.

<https://www.drupal.org/project/context/issues/3111414>

Sarah Goldstein to Everyone 1:15 PM

Thanks all, have to run to another meeting!

Rebel Cummings-Sauls to Everyone 1:15 PM

Others things in logs are just info or warnings, besides email which we don't have setup

Goran Ivaz to Everyone 1:15 PM

Thanks folks, I have to run too..

Jordan Dukart to Everyone 1:16 PM

<https://www.drupal.org/project/warmer>

Jordan Dukart to Everyone 1:18 PM

@Rebel: RE: that error it may come down to certain block config. The maintainers of context
on drupal.org closed the issue as something that couldn't be reproduced.

Rebel Cummings-Sauls to Everyone 1:19 PM

Yes

Jordan Dukart to Everyone 1:20 PM

<https://github.com/Islandora/documentation/issues/1427> as well.

Don Richards to Everyone 1:21 PM

https://github.com/jhu-idc/idc_ui_theme_boots

Jordan Dukart to Everyone 1:22 PM

Have to drop for another call.

Rebel Cummings-Sauls to Everyone 1:23 PM

Thanks

Bye everyone

Online Journals System can do this with an overlay which is nice, perhaps we can use same
back end tool
