*The episodes of MenloMarseilles, MAST3RLINKX, and angrytigerP have been removed from youtube since 8-18-2011

**The episodes of pensivepony are private and removed. The total number of views for Season 1 were found, but the per-episode view count is unable to be determined. Therefore, the views were split evenly 26 ways, and the remainder was added to the first episode. This is not the most accurate solution, but it will have to suffice until more specific data can be found.

My Little Pony: CONVERSIONS ARE MAGIC

oh Celestia I'm worse than Twilight

For sake of calculation all views are assumed to be a full non-stop 22 minutes.
In this count there was a total of 24,115,384 views in season 1.

Converted that is:

530,538,448 minutes

or

8,842,307 hours

or

368,429 days

or

1009 years

That's over a millennium of pony in less than a year

I love everypony that made this possible.

I love this fandom.

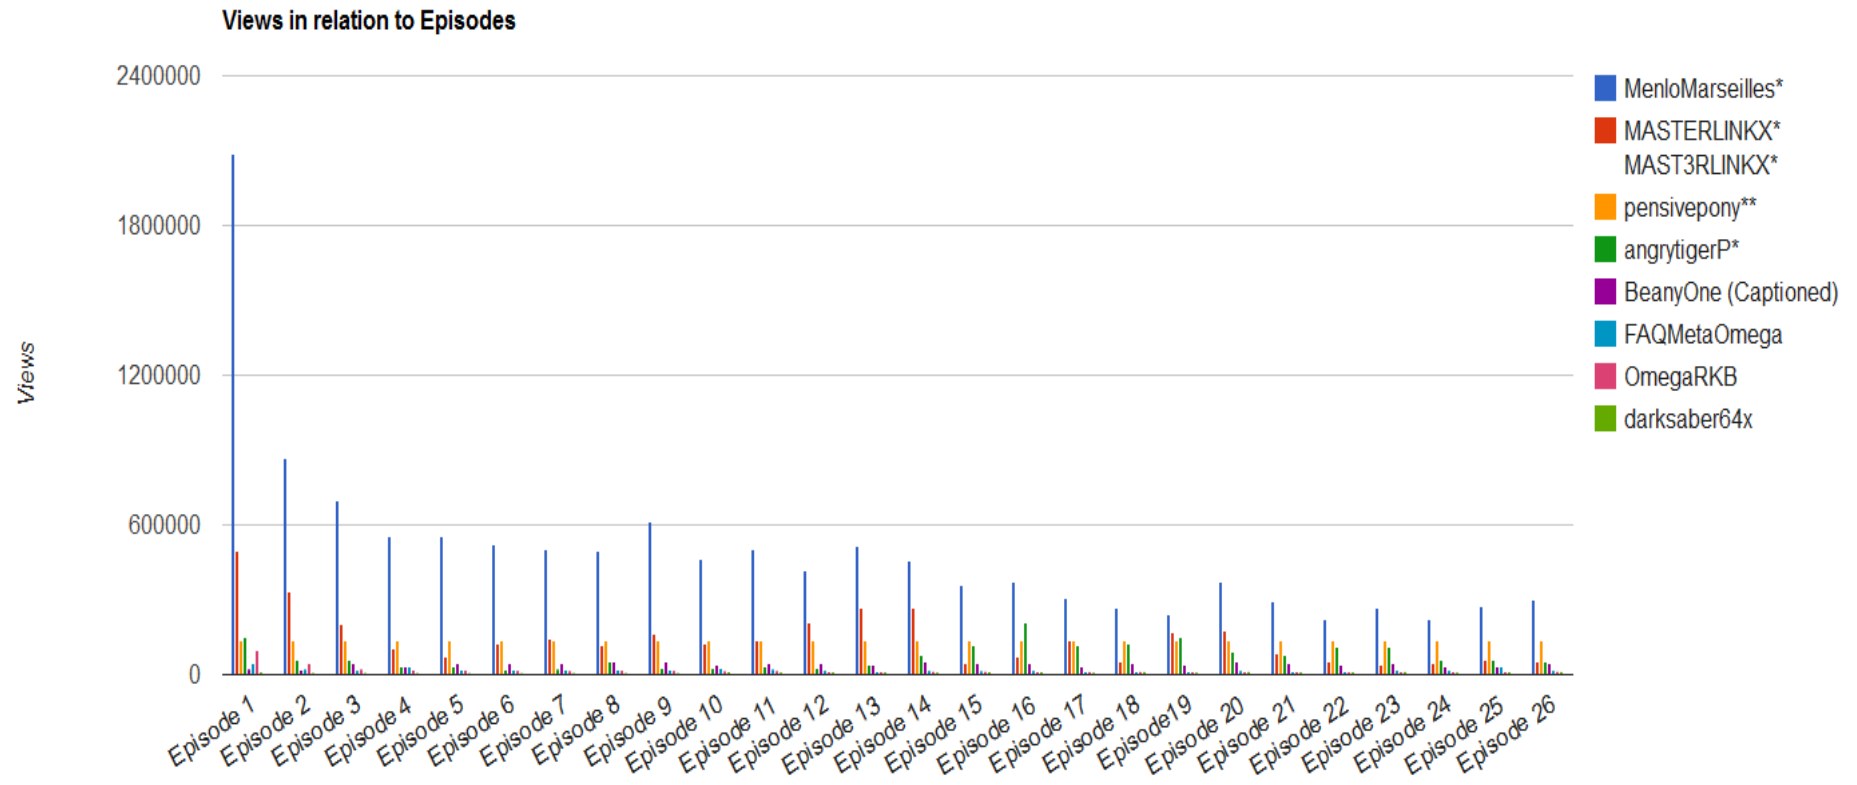

I love every second of its 31,832,306,880 seconds.

I can't wait to see the numbers we hit season 2.
