LEARNING SUMMIT

2024 Personalized Learning Summit

About

Educators, leaders, and community partners will have a chance to connect with innovative peers from across the region and learn more about the expanding adoption of personalized learning practices throughout the region.

The **PL Working Group**, guided by regional education leaders from over 30 districts in SWPA, developed the **Personalized Learning Framework** and a set of supporting **Educator Competencies**. Sessions will be aligned with the key elements of the framework.

The event will also showcase the work of (22) PL Ambassadors, a talented group of innovative educators and coaches who will act as advocates for this transformational shift in instructional focus.

Participants may choose between formal presentations, interactive breakout sessions, and/or collaborative team time to prioritize personalized learning opportunities to meet their needs and interests.

Details
