

**GRADES 1 to 12  
DAILY LESSON LOG**

|                                 |  |                       |                               |
|---------------------------------|--|-----------------------|-------------------------------|
| <b>School:</b>                  | <b>DepEdClub.com</b>                           | <b>Grade Level:</b>   | <b>III</b>                    |
| <b>Teacher:</b>                 | <b>File created by Sir LIONELL G. DE SAGUN</b> | <b>Learning Area:</b> | <b>MATHEMATICS</b>            |
| <b>Teaching Dates and Time:</b> | <b>APRIL 15 - 19, 2024 (WEEK 3)</b>            | <b>Quarter:</b>       | <b>4<sup>TH</sup> QUARTER</b> |

|  | MONDAY   | TUESDAY   | WEDNESDAY   | THURSDAY  | FRIDAY      |
|--|--|---|---|---|-------------|
| <b>I OBJECTIVES</b>  |  |   |   |   |             |
| <i>Content Standard</i>  | Demonstrates understanding of conversion of time ,linear,mass and capacity measures and area of square and rectangle.  |   |   |   |             |
| <i>Performance Standard</i>                                      | Able to apply knowledge in conversion of time, linear, mass and capacity measures and area of rectangle and square in mathematical problems and real –life situations. |   |   |   |             |
| <i>Learning Competency</i>                                       | Visualize and represents and solves problems involving conversion of time measure.   | Visualizes, and Represents, and Solves Routine Problems Involving Conversions of Common Units of Measure<br><b>M3ME – IVc- 40</b> | Visualizes, and Represents, and Solves Non - Routine Problems Involving Conversions of Common Units of Measure<br><b>M3ME – IVc- 40</b> | Visualizes, and Represents, and Finds the capacity of a container using milliliter and liter.     | Weekly Test |
| <b>II CONTENT</b>  | Problems Involving Conversion of Time Measure  | Visualizing, and Representing, and Solving Routine Problems Involving Conversions of Common Units of Measure                      | Visualizing, and Representing, and Solving Non - Routine Problems Involving Conversions of Common Units of Measure                      | Visualizing, and Representing, and Finds the Capacity of a Container using Milliliter and Liter   |             |
| <b>III. LEARNING RESOURCES</b>                                   |  |   |   |   |             |
| <b>A. References</b>   |  |   |   |   |             |
| <i>1. Teacher’s Guide Pages</i>                                  | CG p.16 of 18  |   |   |   |             |
| <i>2. Learner’s Materials pages</i>                              |  |   |   |   |             |
| <i>3. Text book pages</i>  |  |   |   |   |             |
| <i>4. Additional Materials from Learning Resources</i>           |  |   |   |   |             |
| <b>B. Other Learning Resources</b>                               |  |   |   |   |             |
| <b>IV. PROCEDURES</b>  |  |   |   |   |             |
| <i>A. Reviewing previous lesson or presenting the new lesson</i> | How many days are there in June and July?<br>2. How many days are there in August?<br>3. The cold months are December and January.How many days are the cold months?   |   | Choose the best estimate.<br>1. the length of a hairpin<br>a.3 cm b. 3mm c. 3m<br>2. a bottle of ketchup<br>a. 500 L b. 500ml c. 50L    | Liter to Milliliter   |             |
| <i>B. Establishing a purpose for the lesson</i>                  | Let pupils choose the most sensible answers.<br>1. Amor slept 2 ( seconds, hours, days).<br>2. Allan takes 15 ( seconds,hours,minutes ) to take a bath.                | Tell if the following is being measured by centimeter or meter.<br>1. notebook<br>2. land   | Call on two pupils.let them compare the class in terms of height in meters and centimeters.   | How is liquid measured?<br>What units of measurement is used in measuring liquids in a container? |             |

|  |   |  |   |  |  |
|--|---|--|---|--|--|
| <i>C. Presenting Examples/instances of new lesson</i>              | Present a problem.  | Grade 3 class of Bernardo Elementary School conducted an experiment in Science. They found out that laboratory room is about 8 ½ meters long.How many centimeters does laboratory room is?                                 | A laboratory room is 6 ½ meters long. How many centimeters is that?           | Present Milliliter and Liter to find the exact capacity of a container.  |  |
| <i>D. Discussing new concepts and practicing new skills #1</i>     | How did Nena help her mother?<br>What can you say about Nina? | - Who conducted the experiment?<br>- How long is laboratory room?  | What do we do?  | What units do we used in measuring a capacity of a container?  |  |
| <i>E. Discussing new concepts and practicing new skills #2</i>     |   |  |   |  |  |
| <i>F. Developing mastery (Leads to Formative Assessment)</i>       |   |  |   |  |  |
| <i>G. Finding Practical applications of concepts and skills</i>    | Answer Activity 3 in LM.                                      | Divide the class into three. They will write the show me board the datas presented by the teacher.   | LM Activities 1 and 2.  | Divide the pupils in a group.Give them containers .And they want to find out the capacity in each container.   |  |
| <i>H. Making generalizations and abstractions about the lesson</i> | How do we solve problems involving converting time measures?  | How do we solve the problem?   | How do we solve the problems involving conversion of common units of measure? | How do we find the exact capacity of a container?  |  |
| <i>I. Evaluating Learning</i>                                      | Let them answer Activity 4 in LM.                             | Read, understand, and solve.<br>1.The sum total of Joseph is 70 m.How many centimeters does Mang Jose have?<br>2.How many centimeters if the stage of the school is 1700 m?<br>3 – 5 .etc.                                 | LM Activity 4.  | Give the capacity in each container contained.<br>( Teacher will do this ).<br>Original File Submitted and Formatted by DepEd Club Member<br>- visit <a href="http://depedclub.com">depedclub.com</a> for more |  |
| <i>J. Additional activities for application or remediation</i>     | Do Activity 5 in LM.  | Answer the problems..<br>1. How many centimeters does ribbon ,if it is 12 meters long?<br>2. The kitten weighs 500g.How many kilos does kitten<br>3. Boy bought a 12 000 grams of potatos. How many kilos does potato was? | LM Activity 5.  | List down objects or things that can be measured by milliliter or liter.   |  |
| <b>V. REMARKS</b>  |   |  |   |  |  |
| <b>VI. REFLECTION</b>  |   |  |   |  |  |

|  |  |  |  |  |  |
|--|--|--|--|--|--|
|  |  |  |  |  |  |
| <i>A. No. of learners who earned 80% on the formative assessment</i>   |  |  |  |  |  |
| <i>B. No. of Learners who require additional activities for remediation</i>                                    |  |  |  |  |  |
| <i>C. Did the remedial lessons work? No. of learners who have caught up with the lesson.</i>                   |  |  |  |  |  |
| <i>D. No. of learners who continue to require remediation</i>  |  |  |  |  |  |
| <i>E. Which of my teaching strategies worked well? Why did these work?</i>                                     |  |  |  |  |  |
| <i>F. What difficulties did I encounter which my principal or supervisor can help me solve?</i>                |  |  |  |  |  |
| <i>G. What innovation or localized materials did I use/discover which I wish to share with other teachers?</i> |  |  |  |  |  |
