VirtualDJ is the hottest AUDIO and VIDEO mixing software, targeting DJs from the bedroom, mobile, and professional superstars like Carl Cox
With VirtualDJ's breakthrough BeatLock engine, songs will always stay in beat, and the DJ works their mixes incredibly faster than they ever could

The automatic seamless loop engine and synchronized sampler lets the DJ perform astounding remixes live, with no preparation at all. The visual representation and the cues allow a DJ to clearly see the song structure, and never be surprised by a break. The vinyl controls will let you scratch like on a real turntable, except that with the beatlock engine your scratches will never end out of the beat

Add to that the infinite number of cue points a DJ can save for each song and large collection of wonderful automatically beat-synchronized effects

And with VirtualDJ's large collection of skin interfaces to suit everybody from the beginner to the professional DJ, the possibility to record the DJ's mix to then burn to CDs, to broadcasting on the Internet and/or the DJ's own radio station, to use headphones to preview the song, or use an external mixer to perform in a club; VirtualDJ is a DJ's ULTIMATE mix software

Lastly, enter the new era of DJs mixing video enhanced songs (DVD, DivX, MPEG...) which can be sent to monitors, TVs, a projector for display on a giant screen
Features
One-click beat matching and synchronization (FAME algorithm)
BeatLock engine for keeping songs in-sync and in-time
Dynamic beat-matching visualizer
Automatic beat-matched crossfading

Automatic BPM and KEY calculation

Automatic pitch matching

Automatic audio gain matching

Real scratch simulation

Automatic seamless and beat-aware LOOP functionality

Synchronized sampler with 12 instant record and playback slots

Time-Stretch and Master Tempo Pitch algorithms

Automatic first beat and last beat detection

Automatic 4/4 phase detection

Infinite number of cue points per song saved for instant recall each time the song is loaded

Beat-aware effect plugins (included: beatgrid, flippin doubles, vocal remover, frequency filter, flanger, backspin, brake, etc...)

Video mix with windowed or FULL SCREEN TV output using 2nd video output

Karaoke CDG+MP3 and/or ZIP support

FreeFrame and custom video effects

Infinite number of video effects applied simultaneously

DJ-specific video transition plugins

Song database engine with easy-to-use search feature

CoverFlow or text-only song browsing

Compatible with iTunes playlists (iTunes DRM files not supported)

MP3 ID3 Tag compatibility

User-defined automatic filter folders

Automatic Hot-Swap of external hard drives

Ready-to-burn recording of a DJs mix to CD

Broadcast on the Internet

CD to MP3 encoder

Multi-channel sound card, dual-sound card or Y-splitter output for real-time monitoring or external mixer use

ASIO soundcard compatibility

CoreAudio soundcard compatibility

Fully customizable skin engine and shortcut macro engine

VDJScript: powerful macro language used in skins, shortcuts, or controller mapping

Compatibility and customizable mapping with most external MIDI and HID controllers (more than 80 included, many more downloadable)

Optional automatic playlist mixing: VirtualDJ recognizes the style of the music (techno, hip hop, lounge) and adapts the mix accordingly

Netsearch: search and play any song from an online database of more than 8 million tracks

MusicGroup: get live recommendations based on what you play and the feedback from millions of other DJs around the world

GenuisDJ: automatically fill your folders with the latest hits depending on what you usually play
