About Tech 25

Tech 25 is a non-profit workforce development organization focused on creating equity, diversity, and accessibility within the live entertainment industry. We aim to provide youth and adults with career opportunities through classes, workshops, hands-on experience, and mentoring that lead to living-wage careers.

We host events in our space as a way to bring cultural programming to the area and to provide hands on training for our students and apprentices.

Thank you for being a part of our mission.
