SUMMARY

Builds full stack web applications from the ground up — starting at the database schema and carrying through to a deployed, working UI. Primary toolkit centers on Vue3, Laravel, and Inertia.js, backed by hands-on experience with REST APIs, relational database design, and architecture on both the frontend and backend. At Fabled Solutions, focuses on API design, database structuring, and scalable, production-ready interfaces built for enterprise insurance clients. Certified as an I.S.P. (Information Systems Professional) through CIPS Canada, a credential reflecting professional standards and ongoing commitment to the field.

SKILLS

Frontend: Vue.js / Vue3, React.js, Next.js, JavaScript / jQuery, HTML5, CSS3, SCSS & SASS, Bootstrap, Tailwind CSS

Backend: Laravel, Inertia.js, CodeIgniter, PHP, Node.js, REST APIs, MySQL, Database Design & Architecture

CMS & Tools: WordPress, Joomla, Git Version Control, Adobe Creative Suite, Figma, SEO

Programming: Python, C, C++, Data Structures & Algorithms

Other: Usability Testing, Design Systems

WORK EXPERIENCE

Full Stack Software Developer — Fabled Solutions *Dec 2023 – Present*

Edmonton, Alberta, Canada · Remote

Works across the full stack on production systems for insurance industry clients, spanning database, backend, and frontend development.

- Designed and adjusted database schemas — adding new tables and restructuring existing ones — to keep pace with changing business and application needs
- Built and maintained the backend logic and APIs behind insurance industry client applications
- Developed and refined frontend UI/UX with Vue3 and Inertia.js, turning design and business requirements into functioning interfaces
- Shipped full-stack changes end-to-end for enterprise insurance clients, from the database layer up through the user-facing UI
- Contributed to FC Drive — a live-updating F&I product system built for First Canadian Insurance Group's dealership network — along with integrations for Millennium insurance software

IT Support Specialist — Amazon *Sep 2023 – Dec 2023*

Acheson, Alberta, Canada · Hybrid

- Diagnosed and resolved robotics system issues on the warehouse floor, bringing units back to operational status through troubleshooting and system resets
- Coordinated workflow across multiple stations to keep downtime low and operations running smoothly
- Delivered hands-on technical support within a fast-paced, high-volume production environment

Back End Developer — Tindill Electric *Jan 2023 – Sep 2023*

Edmonton, Alberta, Canada · Internship

Built a fully custom WordPress backend from scratch — going beyond a theme or template setup to genuine custom backend development on top of WordPress.

- Built custom WordPress backend functionality that went well beyond standard theme and plugin configuration
- Owned the backend architecture and logic behind a custom business site
- Worked independently across the full custom build, from initial planning through implementation

Frontend Developer — Upwork *Mar 2022 – May 2023*

Edmonton, Alberta, Canada · Freelance / Remote

- Used React.js, Material UI, and SASS to build responsive, component-based UIs for client websites and web applications

- Designed and built client website UI/UX, turning client needs into interfaces that were both functional and user-friendly
- Built and customized WordPress and other CMS-based websites for individual clients and startups
- Produced brand assets for clients, including logos and 3D graphic design work
- Partnered directly with startup founders and small businesses to take products and brands online, covering design, frontend development, and deployment from concept through launch

UI Design Practicum Student — Alberta Blue Cross *Jun 2022 – Aug 2022*

Edmonton, Alberta, Canada · Internship

- Built and maintained design systems that streamlined team workflows
- Led usability testing — scripting and analysis included — to shape user-centric design decisions
- Built and maintained reusable Figma components to keep design consistent and efficient
- Worked across cross-functional teams to deliver AI and VR projects successfully

EDUCATION

Diploma, Digital Media and IT — Northern Alberta Institute of Technology (NAIT) *Sep 2021 – Jul 2023*

Edmonton, Alberta, Canada · Web Design and Development Concentration · GPA 3.7

- Designed web user interfaces while working through web design concepts and best practices
- Built responsive, modern websites with HTML, CSS, JavaScript, and WordPress
- Applied SEO techniques and tracked results using traffic analysis tools
- Built web applications with PHP frameworks (Laravel, CodeIgniter), MySQL, and React
