

Transaction Processing Deliverables: FA25 - SP26

Instructions:

- Make a copy of this document and rename it using the following format: FirstName_LastName_FA'25-SP'26 TP Deliverables.
- Do not delete or modify any of the existing questions/content.
- Add your responses directly below each question in the same document.
- If your response includes a link, please ensure that it is accessible.
- Your deliverables will be checked for AI-generated content. Use of AI tools will result in disqualification.

Question 1:

Give definitions for the terms listed below based on your understanding:

1. HTML- Hyper Text Markup Language is known as the skeleton. HTML is used to format and lay out text on a webpage (This includes images, links, and video).
2. JavaScript – JS helps make webpages more interactive. It controls animations, buttons, validation, and updating content on the spot.
3. CSS – Cascading Style Sheets is the makeup of the web page. This code is used for color, size, alignment, etc.
4. Data dictionary – Is a document that provides a detailed description of the data used in your application. It is used as a reference for individuals that need it. Making sure that everyone understands the structure and meaning of the data.
5. Pseudocode – it's a simplified description of a piece of code written to allow people to understand. Basically, an outline to show how the program works before writing it.
6. Synopsis – is basically a summary of the website. It offers a description of what the usage of the website is, target audience, and what the website is all about, from services to interactive features. It is also used for documentation, presentations, or even proposals.

Question 2:

Create a video walkthrough of the website you created in class, including a clear explanation of its functionality and underlying code. In your video, please include the following:

- A brief explanation of the purpose and functionality of your website.
- A guided tour of the website's user interface and how a user would interact with it.
- A walkthrough of the codebase (HTML, CSS, JavaScript), explaining the logic behind key features.

The video should be around 5-10 minutes long. Upload it to YouTube as Unlisted and paste the link below.

Video Link: <https://youtu.be/kmrEzzetTyw>

Question 3:

Choose any page from the MISSO website (misso.org) and create a diagram that represents its structure and layout.

Your diagram does not need to be exactly the same, but it should clearly outline the main sections and elements of the page (e.g., header, navigation menu, content blocks, buttons, forms, etc.).

You may use tools like draw.io to create your diagram. Do not hand-draw. Paste your diagram below.

MISSO

Question 4:

Write pseudocode for the same MISSO website page you selected for your diagram.

Your pseudocode should outline the main structure and functionality of the page. It does not need to include every detail, but it should clearly reflect the key logic and flow. Use a clear structure and indentation to make it easy to follow.

```
BEGIN PAGE "Become a Member – MISSO Signup"
```

```
// ----- 1. INITIAL SETUP -----
```

```
LOAD site header and navigation menu
```

```
DISPLAY logo
```

```
DISPLAY menu items:
```

```
Home, About Us, Events & Activities, Partnership, Alumni, Members (Become a Member, Newsletter)
```

```
DISPLAY page title: "Become a Member"
```

```
DISPLAY instructions:
```

```
- "Please fill out the following information to submit payment and become a member."
```

```
- "You must be a student at UH main campus to be a MISSO member."
```

```
- "Membership will be for the Fall 2025 Semester. No Refunds."
```

```

ENDIF

// ----- 6. FOOTER -----

DISPLAY footer:

    "2025 MISSO Management Information Systems Student Organization at
    University of Houston. All rights reserved."

END PAGE

```

Question 5:

Use basic HTML to complete the questions below. Each question should be answered using only lines of HTML code - there's no need to build a full website or include a complete page structure like `<!DOCTYPE html>`, `<html>`, or `<body>`.

```
<!DOCTYPE html>
```

```
<html lang="en">
```

```
<body>
```

```
<h1>Hoang</h1>
```

```
</body>
```

```
<a href="https://misso.org" target="_blank">Visit the MISSO Website</a>
```

```
</html>
```

1. Create a heading that displays your first name using an appropriate HTML heading tag.
2. Add a link that takes users to the official MISSO website. Use the `<a>` tag with the correct href attribute so that when clicked, the text opens `https://misso.org` in the browser.

Question 6:

How do you plan to keep the TP committee active, engaged, and learning throughout the semester? Please share any specific ideas or initiatives you have in mind for this role.

- Hold weekly meetings to help members with homework and exam preparation.
- Make a weekly polling in Groupme to keep track of where everyone is at.
- Celebrate members success if they get the grade they wanted.
- (Maybe) set up a discord server
- Create videos to guide members for homework and
- Update the transaction processing committee hub

Question 7

How would you ensure shy or quiet members also feel comfortable asking for help?

For the members that are shy or quiet

- Encouraging questions by setting rules that give members confidence to speak
- Provide multiple ways of communicating (private chatting)
- Create group discussions to show that they aren't the only ones feeling lost
- Set a tone of by being patient, open minded, and supportive
- Ask questions to everyone so it doesn't seem like I'm putting anyone on the spot
