

NMFO Glossary of terms

- Nutshell: The genre or vibe, in ten words or less
- Voltage: A handy 1 to 10 ease-of-listening scale, with 1 being ambient sleep music and 10 being death metal or free jazz. It's an imperfect science, so think of this only as a timesaver. If you don't enjoy aggressive music and you see an 8 or 9 in this category, it probably ain't fer you.
- Thoughts: Why this is worth hearing, in my humblest of opinions. A bit of actual critique, or maybe just dumb things that crossed my mind.
- Pairing suggestion: The ideal setting or activity for enjoying a particular song. For example, some songs are "snuggle with your dog on a rainy day" songs, while others are "stand triumphant atop a mountain of skulls" songs.
