Subject: Protection of property without human intervention

From: Site-56 Director

To: Overseer Council

---

Esteemed members of the Council,

I hope you are doing well, I have not been in contact with you since you had to move Site due to dimensional instability around our Site.

You may be wondering how I am sending this message since our communication was cut and we disappeared. With that, I can only say a lot of time has passed and our technology has improved greatly. Although this ordeal costs us immense amounts of energy.

Thus I pray to god this message reaches you or our work will be futile.

Although dimension rifts happen regularly, it is uncertain where they go. In the instances we've had the chance to see your current reality we have noticed that your right-hand men have a slight problem.

They are being robbed under the gaze of the night, individuals lurking in the shadows waiting for the time to strike and steal important Foundation property.

Witnessing this we couldn't stand idle, and we thought it would be the best time to bear the fruits of our work.

We call Him ..., It. SCP. 912-56. A marvel of anomalous tampering, the prized possession of our research department.

We have managed to harness the power of SCP-914 while sacrificing SCP-7722 and SCP-912 to create a humanoid, powerful and obedient warrior.

We are not certain if he is fully capable, or even stable at that, but we are sure of one thing, it listens and obeys...

Therefore we decided to try and send it into your reality, so you may test its strengths and capabilities.

It may be unstable and we may need to recall it now and then to inspect it.

This new SCP has been assigned to MTF Alpha-9 and is currently in the test phase, it is to be determined if it is of use to the foundation or if it will fail.

Its obedience and combat readiness have been thoroughly explored, therefore it has been equipped with weapons and a Clearance 4 card to access its objective zone.

Glory to the foundation, Glory to Site Command.

---

Designation: SCP. 912-56

Regiment: Alpha-9

Clearance: 4

Current objective: Guard Floor 3 Chemical Storage
