

Getting Started

Download the project [here](#). Download JDK 8 with NetBeans [here](#). Unzip the project and open it with NetBeans.

Java Submissions

1. Add your class to the Humans package
2. Open **GoodVersusEvil.java**, and find the comment that looks like `// Add new classes here`. Add your class to the list.

Non Java Submissions

1. Create a new class in the Humans package. Name it after your submission.
2. Copy and paste [this template](#).
3. Open **GoodVersusEvil.java**, and find the comment that looks like `// Add new classes here`. Add your class to the list.

If you get stuck, leave a comment on the challenge. Alternatively, join us in [The Nineteenth Byte](#) and write a message that starts with @Rainbolt (that's me). Don't be afraid to ask. Someone in the chat will *a/ways* help you if you ask nicely.
