

FERC STUFF

The proposed Corpus Christi LNG Stage 4 expansion is now in the federal Environmental Impact Statement (EIS) process.

This is the time for the public to speak up about:

- ✓ sacred and archaeological sites
- ✓ industrial expansion in our region
- ✓ Tribal consultation and environmental justice
- ✓ community health
- ✓ wetlands and wildlife
- ✓ water impacts

Even when the odds feel stacked against us, public comments become part of the official federal record. Silence also becomes part of the record.

Comments are due by May 29, 2026 at 4:00 PM Central Time.
