Symbol LS4278

Step 1: Configure the scanner to use a prefix & suffix

**Scan Options**

*Data As Is

Enter

Scan Options

<PREFIX> <DATA> <SUFFIX>

Enter

Step 2: Set the prefix to the pipe character (i.e. "|")

Scan Prefix

1

1

2

4

Step 3: Set the suffix to the pipe character (i.e. "|")

Scan Suffix

1

1

2

4

Step 4: Confirm scanning prefixes & suffixes with "|"

With your cursor focused on any input outside of Rundoo (e.g. a document, Google search input, the URL bar of your browser, etc.), scan any barcode. Confirm the output is prefixed & suffixed with "|". In other words, if the barcode number was 12345, we'd expect to see |12345|. If the output does not match, please repeat steps 1 through 3 and if it's still not working call (650) 334-3205 for help troubleshooting.

Step 5: Test it out with Rundoo!

Go to your Rundoo POS & ensure barcode scanning works by scanning products into a sale. If things seem to be working, you're all set! If not, call (650) 334-3205 for help troubleshooting.
