2020-2021

A new course - to the dolphin, out through The Cut, on to the beach.

Another option was to run across the island and a third option was the normal short course from the steps to the beach. Strangely, it was run about two hours prior to a huge high tide. Most of the people on the long course couldn't get around the end of the mole and had to climb on to it and drop down on the other side.
