

Professional Biography

I have been capturing natural landscapes and flora through photography for 50 years, hoping to pass along my appreciation of the natural world so others will be inspired to sustain and preserve that beauty for future generations. All my prints are signed and dated limited editions.

- Creating images with 2¼ medium format and 4x5" and 8x10" large format cameras
- Developing images in darkroom using light, hand tools and silver gelatin paper to convey a sense of depth and texture through selenium tones
- Printing images to archival standards to ensure permanence
- Matting images on 100% archival acid free museum board
- Framing images in black metal to create contrast

Education and Training:
