Rattataki, Sith, Arcanist,

Height: 2 18m / 7'2" - **Weight:** 68kg / 150lbs - **Age:** 322 Years

Description & Loadout

Physical Description

Darth Scimitar has long since been corrupted by the dark side of the Force. He is an extremely tall, yet deathly thin and pale Rattataki male. His skeletal-like features include a bald head, tattoos adorning every inch of his flesh in various cryptic Sith symbols, and amber eyes, bloodshot like he hasn't slept in years. Black circles encompass his eyes with dry, cracked lips that look like a decaying statue. His fingernails are long and sharp like daggers.

General Aspects

Only I Can Live Forever

Darth Scimitar is about as selfish as he is powerful. Despite the promise to share his immortality with his followers and cult, he never has, and never will. He believes only he is worthy of immortality and sees the rest of existence as beneath him.

There Is Only Power And Those Too Weak To Seek It

Being immortal, this naturally gave Darth Scimitar plenty of time to accumulate as much power as possible. Over his centuries of life, he has adopted a philosophy that the only thing that matters is power. Those who are afraid to wield it should kneel before their superiors. Those who don't should be destroyed.

Personality Aspects

Scimitar Is My Past, Present, And Future

Once upon a time, he was Mir Tasc'i. That is no more. The splintering of his soul has created the shell of a man that many used to call a friend. Darth Scimitar was born sociopathic, uncaring, unfeeling. All the stories told about his brutality were true. All true. He is sadistic, maniacal, an embodiment of evil in its truest form, for when one posseses little soul left, empathy is all but nonexistent.

Greatness Inspires Envy, Envy Engenders Spite, Spite Spawns Lies

As sadistic as he is, Darth Scimitar is a proud individual. How many can say they suffered through the agony of unimaginable horrors to become eternal? Whether true or not, Darth Scimitar has a fondness for the stories that are spread about him because in the end they are simply envious of him. That Envy breeds spite, and that spite breeds lies. Not that it matters when he has on many occasions turned those lies into the truth.

Combat Aspects

I Wouldn't Know. I've Never Died

The Ones Who Lived, Come To Die

Naturally, when one is immortal, they can take certain liberties with their safety compared to others. Darth Scimitar is no exception to the rule, often throwing himself with reckless abandon and no regard for his own wellbeing at whatever opposition he faces. Of course, one does not need to die for a perilous situation to be dangerous. Darth Scimitar becomes so single-minded in his need for destruction that he loses sight of the bigger picture and is more susceptible to surprise attacks and ambushes.	Darth Scimitar is vengeful, spiteful, and enjoys inflicting pain upon others that have wronged him. He has a tendency to play with his opponent's, breaking them physically, mentally, and spiritually. Then, and only then, do they have his permission to die. He doesn't care if it lands him in trouble when he could have killed his enemy sooner, to him it's the thrill of superiority. Nothing more. Nothing less.
