OBJECTIVE

Detail-oriented university student pursuing a degree in Civil Engineering. Experienced in AutoCAD, project management, and team collaboration. Seeking an internship to develop practical engineering skills and contribute to meaningful infrastructure projects.

RELEVANT PROJECTS

Structural Design Project

Spring 20XX

ABC University - Portland, OR

- Designed a reinforced concrete building structure adhering to local building codes and industry standards, utilizing AutoCAD and structural analysis software
- Performed detailed calculations for load distribution, member sizing, and reinforcement detailing
- Collaborated with a team of 4 students, employing effective project management techniques to meet deadlines and quality standards

Bridge Design and Analysis

Fall 20XX

ABC University - Portland, OR

- Conducted structural analysis and design for a pedestrian bridge using finite element modeling software
- Optimized the bridge design to meet safety requirements while minimizing material usage and construction costs
- Prepared comprehensive technical reports, drawings, and presentations to communicate design details and considerations

Site Development Project

Fall 20XX

Graduation: May 20XX

ABC University - Portland, OR

- Analyzed the performance of an existing highway interchange using traffic simulation software and field data collection
- Identified bottlenecks and proposed design improvements to enhance traffic flow and safety
- Presented findings and recommendations to a panel of transportation engineers, demonstrating effective communication and data visualization skills

EDUCATION

Bachelor of Science in Civil Engineering

GPA: 3.8/4.0

ABC University - Portland, OR

ADDITIONAL SKILLS

- AutoCAD
- Project management
- Team collaboration
- Technical drawing
