

Caller ID & Spam Blocker

Protect yourself from spam and unwanted calls. Identify unknown numbers, block scammers, and save your time.

Key Features

- **Caller ID** – See who is calling, even if the number isn't in your contacts.
 - **Spam & Scam Blocking** – Automatically filters unwanted calls.
 - **Blacklist** – Add numbers you want to block manually.
 - **Call History & Notifications** – Always know who tried to reach you.
-

How It Works

1. Install the app and grant the necessary permissions.
2. Incoming calls are identified in real-time.
3. Spam calls are automatically blocked or flagged.
4. Add any numbers you want to block manually in the blacklist.

Frustrated by constant spam messages, unwanted calls, and notifications that interrupt your day? This application is built to give you complete control over your digital communication. Whether it's promotional SMS, robocalls, suspicious links, or spam emails, the app provides comprehensive protection, keeping your phone organized and free from unnecessary distractions. With advanced filtering technology and customizable rules, it acts as a personal shield against all forms of spam.

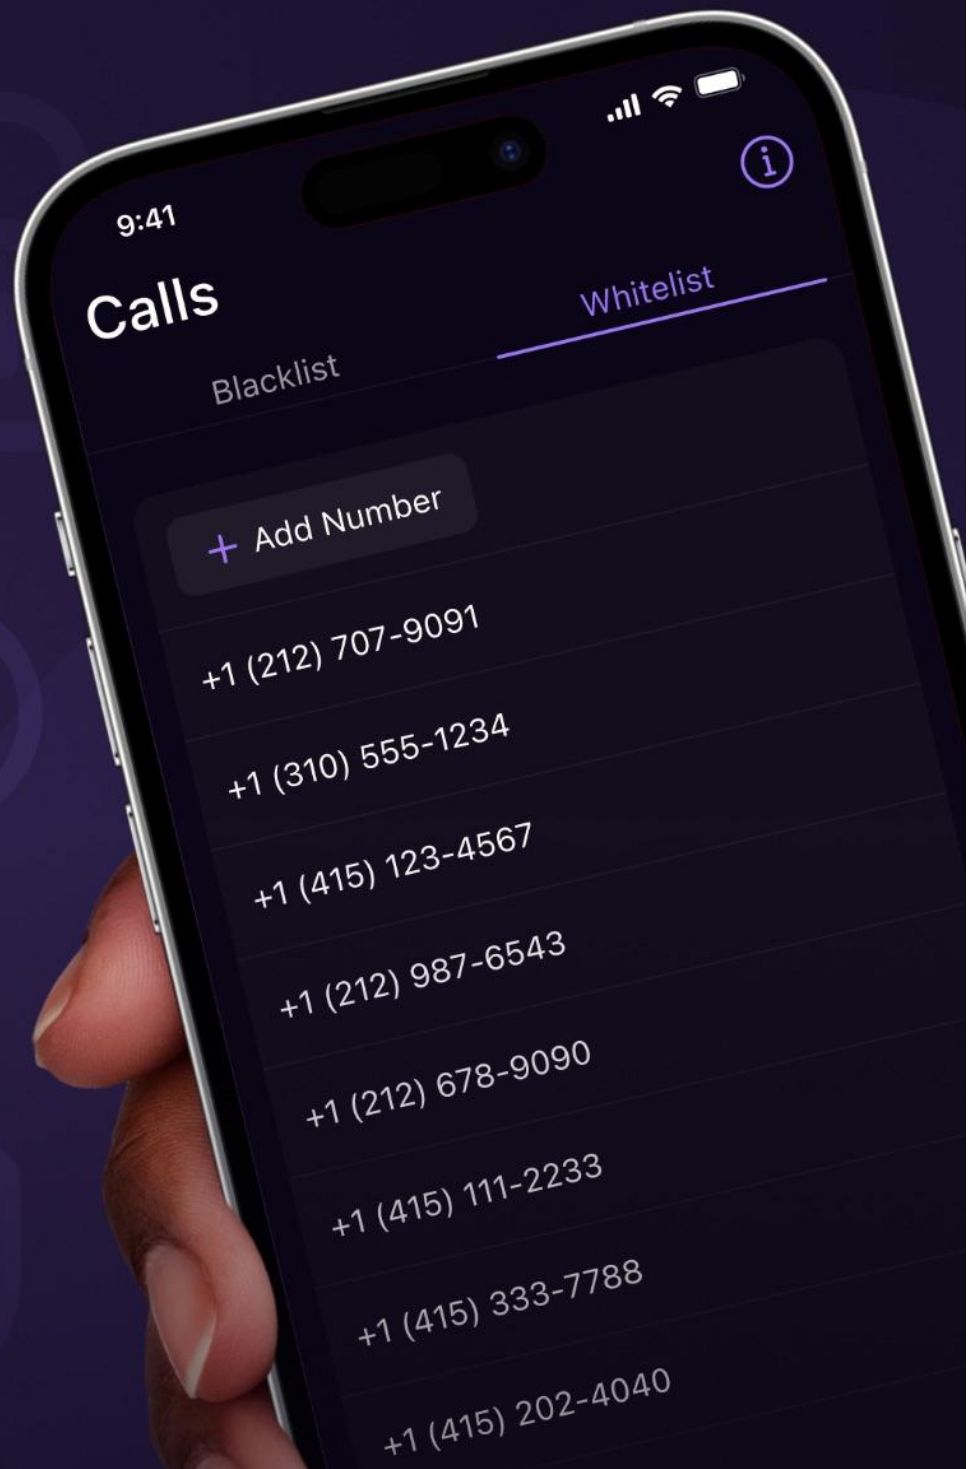

From unsolicited marketing texts to persistent telemarketers, modern spam comes in many forms. This application allows you to block them efficiently. Filter SMS and MMS, stop messages with suspicious links, block robocalls, and manage incoming emails effortlessly. The app works automatically in the background, so you never have to deal with spam manually. Your inbox and call log remain clean, letting you focus on what truly matters.

Setup is simple and user-friendly. Enable filtering and adjust preferences according to your needs. All filtering is done locally on your device, ensuring your data stays private and secure. You can create custom rules, edit blacklists and whitelists, and block entire categories of unwanted content. Whether it's short numbers, emails, or unknown callers, the system adapts to your personal preferences.

Get full access:

- Unlimited spam blocking filters with no restrictions.
- Custom rules for flexible and precise filtering.
- Comprehensive blacklist and whitelist management.
