Agenda

Announcements

- * No announcements this week.

CPC and Board Meeting Updates

*Extracted from **tsc-agenda** labeled issues and pull requests from the **nodejs org** prior to the meeting.

nodejs/node

- * Adding HTML form data handling to core
[#38943](<https://github.com/nodejs/node/issues/38943>)
 - * Not time sensitive, decided to wait for a meeting where we have Matteo.
 - * Myles, two things to talk about
 - * Higher level feature
 - * mime, lower level parts that might make handling form data easier. Some other platforms do have the lower level parts.
- * Automating npm updates with a bot [#38879](<https://github.com/nodejs/node/issues/38879>)
 - * Wanted to document in the minutes that its ok.

- * No objections from those in the meeting, Myles will follow up separately on any policy related stuff.

- * Future of the Node HTTP Client [#38533](<https://github.com/nodejs/node/issues/38533>)

- * We discussed this before, agreed with the ask for references in the Node.js docs. Taking off the agenda for now.

- * Tracking Issue: commit queue issues and feedback
[#34770](<https://github.com/nodejs/node/issues/34770>)

- * Was discussed in the meeting today, nobody advocated for removing it so let's leave it for a bit longer/try to fix.

- * Those in the meeting would also be ok with removing, if Mary/those involved in maintaining the queue decide we should remove it.

- * Rename default branch from "master" to "main" or something similar
[#33864](<https://github.com/nodejs/node/issues/33864>)

- * slowly making progress

- * Migration of core modules to primordials
[#30697](<https://github.com/nodejs/node/issues/30697>)

- * Ruben, don't see the reason to do, but do see a number of downsides

- * Suggesting we stop porting primordials until more discussion has completed

- * Suggestion of letting the discussion continue in the issue for a few weeks, then Bring back TSC.

Strategic Initiatives

- * No updates this week
