ARTICLE TITLE (MAXIMUM 15 WORDS)

Author Name 1[1]*, Author Name 2[2], Author Name 3[3]

[1] Institution/Affiliation, City, Country; [2] Institution/Affiliation, City, Country; [3] Institution/Affiliation, City, Country

**Corresponding author: email@domain.com | ORCID: https://orcid.org/0000-0000-0000-0000*

GENERAL INSTRUCTIONS: Use this template without changing the page size or main formatting. The recommended manuscript length is 5,000-8,000 words, including tables, figures, and references. Delete all gray instructional text before submission. In-text citations and references must follow APA Style, 7th Edition.

ABSTRACT (ENGLISH)

Write the English abstract in one paragraph (150-250 words). Include the research problem/background, objective, method, main findings, and conclusion/implications. Do not include citations, tables, figures, or uncommon abbreviations. Use single spacing.

[Write the English abstract here. Replace this instructional text with the final abstract.]

Keywords: *3-5 specific keywords or key phrases; separate them with semicolons.*

ABSTRACT (INDONESIAN)

For manuscripts written in Indonesian, provide an Indonesian abstract in one paragraph (150-250 words) containing the research problem/background, objective, method, main findings, and conclusion/implications. Do not include citations, tables, figures, or uncommon abbreviations. Use single spacing.

[Insert the Indonesian abstract here. Delete this instructional text when the manuscript is complete.]

Keywords (Indonesian): *3-5 specific keywords or key phrases; separate them with semicolons.*

INTRODUCTION

Develop the introduction as an argument: research context and problem, supporting empirical evidence, state of the art, relevant previous studies, research gap, novelty, and research objective/question. Avoid an introduction dominated by definitions. Prioritize primary and recent scholarly sources.

[Write the introduction here. The opening paragraphs should establish the context and urgency of the problem. The final part of the introduction should explicitly state the research gap, novelty, and research objective/question.]

RESEARCH METHOD

Explain the research design/approach, setting and timeframe, participants or data sources, sampling or informant-selection technique, instruments, data collection procedures, data analysis, and validity/trustworthiness procedures. For literature reviews, explain databases, search strategy, inclusion/exclusion criteria, screening process, and analytical method. Include research ethics information when relevant.

[Write the research method here in sufficient operational detail so that the study can be understood and, where appropriate, replicated.]

RESULTS AND DISCUSSION

Present findings systematically in relation to the research objectives/questions. The discussion should interpret the findings, explain why they occurred, compare them with previous studies, connect them with relevant theory, and demonstrate theoretical/practical contributions and novelty. Do not merely repeat the results.

[Write the results and discussion here. Use subheadings when helpful. Tables and figures should be used only when they clarify findings and must be referred to in the text.]

TABLE AND FIGURE GUIDELINES (DELETE THIS SECTION AFTER FORMATTING)

Number tables and figures consecutively. For tables, write 'Table 1' in bold above the table, followed by an italicized table title on the next line. For figures, write 'Figure 1' in bold with a consistent figure title. Provide source notes for adapted materials. Tables must remain editable rather than embedded as images, and figures must have adequate resolution.

Table 1

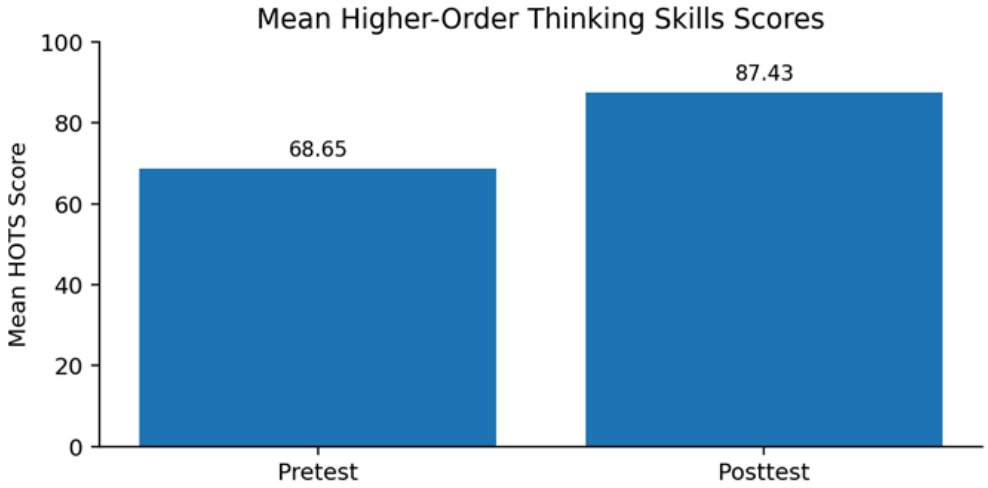

Students' Higher-Order Thinking Skills Before and After the Learning Intervention

Learning Outcome	Pretest M	Pretest SD	Posttest M	Posttest SD
Analysis	70.25	6.42	86.75	5.18
Evaluation	68.90	7.11	88.10	4.96
Creation	66.80	7.54	87.45	5.27
Overall HOTS	68.65	7.02	87.43	5.14

Note. M = mean; SD = standard deviation; HOTS = higher-order thinking skills. The values shown are illustrative examples provided solely to demonstrate the required table format.

Figure 1

Mean Higher-Order Thinking Skills Scores Before and After the Learning Intervention

Note. The figure illustrates an example of the increase in students' overall HOTS scores from pretest to posttest. The values are provided solely for formatting illustration.

CONCLUSION

The conclusion should directly answer the research objective/question, synthesize the main findings, and state the study contribution. Avoid repeating the abstract or restating all results. Approximately 150-250 words, or as needed for the complexity of the study. Implications, limitations, and recommendations may be included when relevant.

[Write the conclusion here in a concise, substantive, contribution-oriented form.]

ACKNOWLEDGMENT

Optional. Acknowledge individuals or organizations that provided academic, technical, institutional, or other support but do not meet authorship criteria. For the initial double-anonymous submission, anonymize information that could reveal author identity when necessary.

[Write the acknowledgment here, or delete this section if it is not applicable.]

AUTHOR CONTRIBUTIONS

Describe each author's contribution transparently, for example: conceptualization, methodology, data collection, analysis, drafting, review, and editing.

[Example: Author 1: conceptualization, methodology, analysis, and original draft. Author 2: data collection, validation, review, and editing.]

FUNDING STATEMENT

State the source of research and/or publication funding. If there was no external funding, state this explicitly.

[Example: This research received no external funding.]

CONFLICT OF INTEREST

Disclose any financial, institutional, professional, or personal conflict of interest. If none exists, state this explicitly.

[Example: The authors declare no conflict of interest.]

DATA AVAILABILITY STATEMENT

State whether the research data are available, where they can be accessed, and any applicable restrictions. If the data cannot be shared because of ethics or confidentiality, briefly explain why.

[Insert the data availability statement here, or delete this section if it is not applicable.]

RESEARCH ETHICS STATEMENT

Required for studies involving human participants, sensitive data, or other ethical considerations. State ethics approval and informed-consent information when relevant.

[Example: Ethical approval was obtained from ... under approval number .... Informed consent was obtained from all participants.]

AI USE DISCLOSURE

If Generative AI was substantively used for language editing, coding, data processing, or other activities, disclose the tool and purpose. AI tools cannot be listed as authors. Authors remain fully responsible for the accuracy, originality, citations, and integrity of the manuscript.

[If no substantive AI use occurred, write: The authors declare that no Generative AI was used to generate research data, analysis, or substantive scholarly content in this manuscript.]

REFERENCES

List only works that are cited in the manuscript. In-text citations and the reference list must follow APA Style, 7th Edition, using the author-date system. Footnotes must not be used as the primary citation system; they may be used only for essential supplementary explanations. Authors are strongly encouraged to use a reference manager such as Mendeley, Zotero, or EndNote with APA 7th Edition selected.

Official APA Style guidance: https://apastyle.apa.org/

Prioritize primary and recent scholarly sources, especially peer-reviewed journal articles published within the last 10 years, while retaining relevant classic or foundational works. Include DOI links in URL format (https://doi.org/...) whenever available. Arrange references alphabetically by author surname and apply a 0.5-inch (1.27 cm) hanging indent.

Examples of In-Text Citations (APA 7th Edition):

One author: (Rahman, 2024) or Rahman (2024).
Two authors: (Rahman & Yusuf, 2024) or Rahman and Yusuf (2024).
Three or more authors: (Rahman et al., 2024) or Rahman et al. (2024).
Direct quotation: (Rahman, 2024, p. 24).
Multiple sources: (Rahman, 2024; Yusuf, 2025).

Reference Format Examples (APA 7th Edition):

Book: Author, A. A. (2024). *Title of the book*. Publisher.

Journal article: Author, A. A., & Author, B. B. (2025). Title of the article. *Journal Name, 12*(2), 123-140. https://doi.org/10.xxxx/xxxxx

Book chapter: Author, A. A. (2024). Title of chapter. In B. B. Editor (Ed.), *Title of the book* (pp. 10-25). Publisher.

Webpage: Organization Name. (2025, January 15). *Title of webpage*. https://example.org/page

PRE-SUBMISSION CHECK: Delete all gray instructional text; anonymize the manuscript for double-anonymous review; ensure that the title, abstracts, keywords, and author metadata are consistent with OJS; verify that every in-text citation appears in the reference list; and confirm that all references follow APA Style, 7th Edition.
