Kangaroos

By Jaycee

Kangaroos only live in Australia and South Africa. Also A group of kangaroos is called a Troop, Mob or Court and they are a Animal.

They can jump 9m in one jump they can also swim. Can carry up to 3 growing Joey in her pouch at one time. And balance on their tails.

A baby kangaroo is called a Joey, and they feed their babies milk. Most of the kangaroos eat grass and the mama kangaroo can have triplets too.

A male kangaroo is 66 kgs.

Kangaroos are interesting animals because they can hop over 55 kilometers in an hour and can jump 9m in one jump.

They are very furry. They have a little pouch to put their Joeys in. Also, they are different spies. Kangaroos have powerful hind legs.
