01. We know that whatever gas prices are now, they can always go higher.

Big Oil has no problem fleecing us at the pump for their profits. We want an end to their greed and a swift transition from fossil fuels.

02. Gas prices go up and down...but never as down as they used to be.

Big Oil wants us to get complacent with high gas prices. We need to ditch fossil fuels all together and invest in affordable, sustainable energy.

 [\[click to tweet\]](#)

03. The cycle of high-then-low gas prices is almost as toxic as the fossil fuels Big Oil is pumping into our atmosphere.

It's time to end our reliance on fossil fuels and commit to a sustainable, just transition.

04. Right now, we rely on gas to power our cars and take us places we need to go. And that allows Big Oil to price gouge us as much as they want.

It's why the need to invest in sustainable, affordable energy is more urgent than ever. We need Big Oil out of our lives for good!
