The possibilities would be ENDLE 💰 💰 for Black women if the wage gap was eliminated.

Today is Black Women's Equal Pay Day - a reminder that Black women are still losing thousands of dollars each year in the workplace.

According to the U.S. Census, on average, Black women were paid 63% of what non-Hispanic white men were paid in 2019. That means it takes the typical Black woman 19 months to be paid what the average white male takes home in 12 months.

Paying Black women accordingly shouldn't be an option.
