General Theme:

We should embrace tech in our reading workshops, but we do need to be mindful about how we use tech. In my learning journey I have made lots of mistakes and still have a long way to go, but I keep coming back to my roots. Reading Workshop should be about our ***readers actually reading***. My stance is that tech should be a way to expand our purposes for reading, not something to do because it is "21st Century Learning." *I work hard to keep my eye on literacy before I dive into the murky waters of tech. Be Authentic in what you do in service to your readers.*
