

Gardening & Greening with Students...VIRTUALLY!

Resources for Hands-On Learning

BALTIMORE CITY
PUBLIC SCHOOLS

School Year 2020 - 2021

Because standard activities involving gardening and greening may not be possible amid the virtual or hybrid learning landscape, the Baltimore City Public Schools Farm to School team and Baltimore Office of Sustainability have collaborated to compile a short list of activities that may be appropriate for green teams, classes, or other student groups interested in planting, food systems, and sustainability. The following resources are organized by grade level. With specific questions related to these or other activities -- or issues with any hyperlinks -- please email green@bcps.k12.md.us.

The following lists have been curated for relevance, but full menus of virtual experiences and in-person experiences are available [here](#), along with more details and contact information for registration.

Pre-K, K, Elementary School

Virtual Field Trips (full list [here](#))

- Great Kids Farm field trip:
 - [2nd grade package](#)
