1. Introduction

1.1 Documented individual

This is a personnel file on the Kewpie Site-65 Senior Researcher Reiner Zephyran; Former Executive Researcher. This file has been created due to a recent incident involving Mr. Zephyran and Executive Researcher Swan. They have been taken into base after asking for protection against an unknown anomaly which was unknowingly manifested by Mr. Swan. Both Researchers received Class-E amnestic treatment to let them forget everything about Mr. Swan's Type-Green abilities and their resurrection as Type-Grays. It is important to note that the anomaly was a result of Mr. Swan's resurrection. As far as we know Mr. Zephyran has not shown any signs similar to Mr. Swan yet.

3. Early Life and Career

3.1 Life before and after Employment by Kewpie

The individual grew up in a small town in the area of Bavaria; Germany, where he worked as a chemical laboratory technician for around 9 years after finishing school. It is not known what his work consisted of exactly during that time, but he has at least basic level knowledge about chemistry. This knowledge has been expanded after being employed as a Researcher by Kewpie personnel of Containment Site-46, near Munich; Germany. According to files we have gathered during raids on Site-65 and Site-49 Zephyran was transferred to Site-65 seven (7) years after he was initially recruited. The reason that was stated in these reports was: "Personal Reassignment Request". Since then he has reached the position of Executive Researcher and participated in many confidential projects and orders. Older Coalition documents show that he has interacted with a former GOC Major, called "The Insurgent" multiple times. The reason for these meetings are unknown, however not a single one of these meetings have resulted in any kind of conflict, so we can assume that they have had a positive relationship. After being removed from Executive Researcher for the first time he has spent a few months in the position as a Senior Researcher before re-applying for Executive. Informants within Kewpie Site-65 found out that Reiner Zephyran was

one of three (3) Researchers executed on the 18th of August 2024. It is unknown how he ~~survived~~ was resurrected, but he has shown great interest in the tales of the angel of death, Azrail, in the past.

(Cognitohazard Redacted).

Reiner was a high-ranking member of a Research Task Force designated Upsilon-6, specializing in studying and neutralizing sarkic threats. We formed an alliance with U-6 and worked together to translate sarkic messages spread around the site. More information about the mentioned events can be found in their respective files. Reiner joined the Joint Task Force designated Epsilon-10, where he witnessed one of the anomalies stored in the Research lab explode, killing multiple Researchers in the process. No further involvement Haß occurred since. Informants heard rumours regarding a planned Research Operation, designation "Venator", ~~possibly weaponizing an instance of KTE-669 Gorgon~~ (I have been assured that this project will not interfere with any of our missions; LT 'Curiosity'). Mobile Task Forces with special training in fighting KTE-669 instances will be deployed to assist in the capture of the Threat Entity.

Sr. Researcher Reiner Zephyran

Description:
Executive Researcher Jimmy Swan contacted our FOB over comms requesting help with an anomaly that has been haunting him since his execution by Mobile Task Force Omega-1 under order of the Ethics Committee. These hauntings were related to his PTSD, manifesting as an Omega-1 Operative in and around pinewood. UTE was neutralized within our FOB after opening fire on the Executive Researcher and our Operatives. Physical tests on the Executive have shown signs of a Type-Gray. His blood was coagulated and he was dead on the inside. No signs of this have been noticeable on the outside.

Description:

Shortly after Curiosity's promotion to LT a message from Sr. Researcher Reiner Zephyran of Site-65 reached LT 'Curiosity' over the unknown comms line designated <SE/30/24>. A meeting is currently being prepared to discuss the Details of Mr. Zephyran's request.

Request:

"I require help restoring SCP-9384 and I'm nearly out of ideas. I am hoping that you might be able to come up with new ideas and help me with this last idea I have. It will involve SCP-079 and a decent amount of lies and illusion.
