QUESTIONNAIRE WASTEWATER TREATMENT PLANTS

1. The name of the wastewater disposal facility and the nature of the effluents (household, industrial, stormwater, mixed effluents, etc.) _____
2. Characteristics of wastewater supplied for treatment:
 - 2.1. Average daily waste water consumption, m³/day _____
 - 2.2. Maximum possible daily consumption, m³/day _____
 - 2.3. Maximum hourly flow rate, m³/hour _____
 - 2.4. Drainage mode (gravity or pressure) _____
 - 2.5. The place of discharge of treated effluents (into the sewer, on the relief, into the reservoir) _____
 - 2.6. The mode of discharge of treated effluents (pressure or gravity) _ pressure _____
- 2.7. The quality of wastewater supplied for treatment and the required quality of treatment (the latter indicated if there are additional requirements of local sanitary and environmental supervision authorities):

The content of harmful substances in wastewater	Source drains	Treated drains
1. Temperature, °C		
2. Total iron, mg/l		
3. Suspended solids, mg/l		
4. Dry residue, mg/l		
5. BPK ₅ , mgO ₂ /l		
6. CHPK, mgO ₂ /l		
7. Chlorides, mg/l		
8. Sulfates, mg/l		
9. Ammonia nitrogen, mg/l		
Nitrite nitrogen, mg/l		
Nitrate nitrogen, mg/l		
10. Phosphates, mg/l		
11. Fats, mg/l		
12. Petroleum products, mg/l		
13. SPAV, mg/l		
Specific substances specific to local conditions:		

The system of household and drinking water supply is designed to supply water to the household needs of consumers
Drains from the dining room are provided through a grease trap.

The treated effluents will be used for watering green spaces, or exported to evaporation ponds.

3. The proposed location of the wastewater treatment plant (in an existing room, in a prefabricated module, in a new capital building, other)
_____ in a prefabricated module

4. Required scope of services (design, delivery, installation or supervision, commissioning)

5. Details of the customer (company, address, phone, fax, e-mail, full name of the head):

Head of the company: _____

_____ M.P.
