

Alright. I can't deal with it anymore. I wanted to post this a few days ago when it happened but I have been just too weirded out and confused and also afraid of what anyone is going to say. All I can tell you is that I am not lying, I have no reason to lie, and am I am just really freaked out. You can choose to believe it if you want.

I'm bad at summarizing but I will do my best. Feel free to skip the background info but it has some important stuff towards the end. TLDR at end.

Background:

I found out about the ME in 2017 watching countless videos (usually like top 10 videos) and there were many that affected me and many that were odd and curious. Some I didn't know at all.

Some that really bothered me were:

"**Febreeze**" (It has 2 e's and I used the stuff way too much since 6th grade).

"**Objects in mirror MAY BE closer than they appear**" (I've been driven my whole life including two and from school until I was 16 and then drove myself in my Nissan Altima, every mirror always said that until 2013 when I saw the change on my new Nissan Versa, and was a bit surprised when it was more affirmative "Objects in mirror ARE closer than they appear" -- So, I thought the government changed the law for what needed to be on these mirrors and never questioned it until 4 years later when I learned about the ME.

Others include: **Fruit of the Loom, Kit-Kat, Fruit Loops (THIS IS IMPORTANT), Monopoly Man, Tinkerbell** with the pixie dust or wand starting Disney movies, **Mona Lisa, The Thinker, Sex IN the City** (When I was a little kid, I knew that I wasn't supposed to know things about sex, but I saw this on the TV guide and also I didn't understand why it was "in" the city. Very strong memories even though I never intentionally watched this show).

Then there was the topic of "flip flops" which really was interesting to me. As I just learned what the ME was, I hadn't had one but I saw many people talking about it on YouTube and probably Reddit or w/e site I was using then. This is where my issue comes in.

At that time, the two most popular flip flops AND ALSO REGULAR MANDELA EFFECTS (this is important) that were being discussed were "Tidy Cat/Tidy Cats" and the Apollo 13 Movie with Tom Hanks with the quote that AT THAT TIME in 2017, was a Mandela Effect.

I didn't know Tidy Cats very well but I thought maybe it was Tidy Cats but I wasn't affected much by it but, for fun, I screenshotted a Google Image result for it which showed the brand was Tidy Cats. I saved the file and named it "TIDY CATS (THERE IS AN S HERE IN CASE IT IS REMOVED 8-28-17)" as people said residual things like my own interpretation wouldn't change but names would. This hasn't changed.

What I am experiencing:

* **Here is where MY major issue comes in:** I happened to be in my YouTube Favorites playlist the other day. I was looking for some stuff and I happened to see the "Apollo 13 (1995) – Houston, We Have a Problem Scene (4/11) | Movieclips" video there. I seemed to have favorited it back in 2017 in case it flip flopped.

[Apollo 13 \(1995\) – Houston, We Have a Problem Scene \(4/11\) | Movieclips \(youtube.com\)](https://www.youtube.com/watch?v=Ug9e0xxDSW8)

I had NEVER seen this movie even until now. In 2017, one of the big Mandela Effects (which is still widely discussed here but only as a flip flop) was that the Tom Hanks line had CHANGED to "Houston, We've Had a Problem". People at the time said that it was ALWAYS that way AND that it matched the official real line said by the astronauts. I had NEVER seen the official NASA video/audio of the event at that time.

So, curious, I watched the video linked here in 2017 and Tom Hanks clearly, clear as day, said "Houston, We've Had a Problem" which sounded weird to me and it was not the famous (pop culture) quote that everyone knows. BUT, I had NEVER seen the movie so I had no way to know. It seemed off but I just favorited it in case somehow it changed (like the Tidy Cats thing I did above).

By now, you see the issue. I clicked on the video a few days ago and it played... He says "Houston, We Have a Problem". And at first, I didn't even notice anything wrong. And then I said... wait, it sounds "right" now (pop culture right). I watched it again. Now I start to panic. I immediately YouTube "Apollo 13 Mandela". There are literally almost no results (the results are all just official movie videos or very recent YouTube Shorts or videos that are VERY recent. There is nothing from 2017 or when I saw the ME videos (which were HUGE videos). I tried searching InPrivate/Incognito. Nothing. Apollo 13 is no longer a Mandela Effect. I saw maybe one video that possibly had something but it didn't have many views. So, panicking more, I just Google it and find this Reddit of course which I have been on before. Everyone is just talking about it being a flip flop. There is no talk of it being a ME because it is NOT currently a ME because the quote is the "right" quote or the one that everyone said was original (the movie NOT matching the real event). So, I decided to watch the

official NASA video/audio for the first time. I had NEVER seen it before so I was never conflating anything. And it was pretty obvious that NASA version says WE'VE HAD but Tom Hanks NOW says WE HAVE (in 2017 he said WE'VE HAD and it was a HUGE popular ME!).

So, I've had my first flip flop which only solidifies that reality is changing. I was affected by multiple MEs as I wrote above, but this experience is much more scary and something you can't really understand until it happens.

NOW, the other problems are:

1. With this flip flop, ALL former Mandela Effect VIDEOS AND ARTICLES about Apollo 13 (the movie) have essentially disappeared even though I read and watched them along with others.
2. More disturbingly, reading through this Reddit, the flip flops in this "reality" are not what I remember them to be. I remember the FrUIT Loops vs FrOOT Loops ME very well. In 2017, it was NEVER referred to as a flip flop in anything that I watched or read. AND, the ME videos and comments were saying that the ORIGINAL version was FRUIT Loops and that it changed to FROOT Loops. FROOT was the ME. But the flip flop posts all seem to be in agreeance that the ORIGINAL was FROOT, it changed to FRUIT and flop flopped BACK to FROOT. If that is true, that is not the reality I was in during 2017 when I found the ME.
3. I literally favorited a video in case something like this happened and it did. So what the hell do I do now? And is this a normal occurrence for a flip flop that all of a sudden the related videos for that don't exist anymore? It seems like the only videos that I can find for Apollo 13 movie ME are NEWER, LOW VIEW videos that only include it BECAUSE of this FLIP FLOP. But I swear to God, it was a regular ME in 2017 WITH people chiming in that it was ALSO a flip flop! But all evidence of it ever being a regular ME seem to be gone (unless you can PLEASE show me some) and only flip flop information remains (like a weird type of residue).

TLDR: Had a flip flop for something that didn't even cause the ME for me but I watched it in 2017, saved it, watched it now, and it flip flopped. All evidence of that ME are gone now (except for the flip flop) and this "reality's" flip flops include things that are reverse from what they were in 2017 that I never heard of.
