

Email Subject line: Are You Ready For The Untold TRUTH?

The Matrix doesn't want you to know this.

Yesterday we spoke about the testosterone crisis and how badly it will affect men.

Today I will show you the biggest problem and how to solve it.

You most likely never heard of it.

If you are arrogant enough to skip this email, you deserve to risk being infertile.

Yes, that's the consequence you could literally suffer.

If you have read yesterday's email, you will know exactly how important this knowledge is.

It can save your bloodline and your life FOREVER.

There's a reason EVERY SIXTH PERSON experiences infertility in their life.

And it keeps on rising every year...

You don't want to be the one that ends centuries of generations, do you?

Let me reveal the one thing most detrimental to your testosterone first...

Plastic... Your WORST enemy.

You do not want to be near it at all, let alone touching it, yet it's ALL AROUND YOU.

You are probably even reading this from a phone cover that's... PLASTIC.

"Ahh, well, Ricky is probably just being extreme", Don't you think that you SHOULD be extreme if your children's lives are literally on the line?

Having children is literally the main purpose for any man.

You don't want to be that guy who disappoints all your ancestors, do you?

They are looking at your every step. Watching your every move.

And once the doctor says you're infertile in front of your wife, maybe then you will regret not taking it to the "extreme."

A study in 2014 found that there are certain chemicals (BPA) in plastic that have reduced levels of testosterone.

And a recent study found that ANYONE who uses hand sanitizers after being exposed to one of those chemicals will experience it 100 times worse.

A HUNDRED... Imagine the times you fell for this trap during covid.

And that's not it either; receipts, toothpaste, shampoo, deodorant, polyester clothes and the list goes on and on...

Have you ever taken a look at the ingredients of your toothpaste?

It's probably a list full of lab words you never heard of.

Do you know what mine has? Three ingredients...

All natural and work in favor of my testosterone.

It's not even a normal toothpaste, it's more of a powder.

If you have fluoride toothpaste, you might as well just throw it out the window.

It's another chemical terrible for your testosterone. Avoid it at all costs.

There is one more thing that you MUST know if you want to achieve or even surpass the levels of testosterone from your ancestors.

If you don't take this seriously, you might even end up paying the ultimate price for this.

Do you keep your phone in your pocket?

Say goodbye to your testosterone if you do...

Keeping your phone in your pocket over a long period of time can half your sperm count because of harmful exposure to radiation from it.

Do you now understand why infertility rates are scaling up each year?

Our surroundings are setting us up for failure, but we will not allow ourselves to be a feather in the wind.

You have now received all the knowledge you NEED to know.

You know HOW, but now it's up to you to take action.

After all, I can only lead a horse to the water, I can not force it to drink.

See you soon.

- Ricky
