What Is Involved in Getting a Dental Implant?

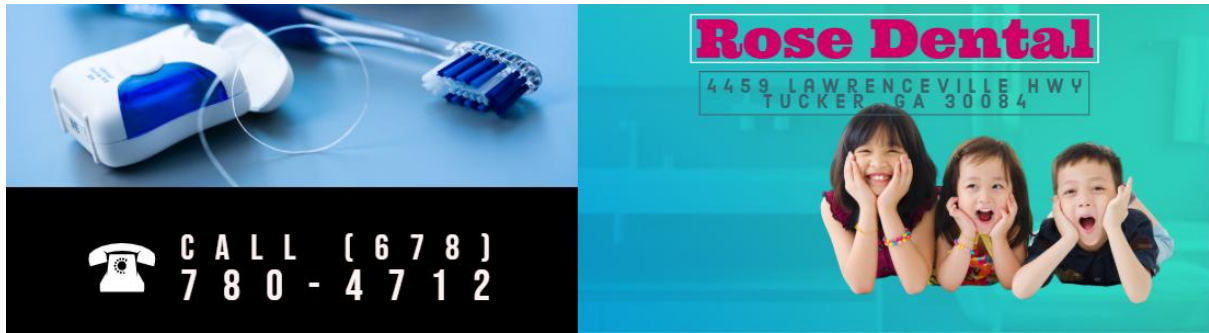

The first step in the dental implant process is the development of an individualized treatment plan. The plan addresses your specific needs and is prepared by a team of professionals who are specially trained and experienced in oral surgery and restorative dentistry. This team approach provides coordinated care based on the implant option that is best for you.

Bonding

Bonding is a treatment that can be used to repair teeth that are decayed, chipped, fractured or discoloured or to reduce gaps between teeth. For this procedure, a

dentist mixes composite resin — a type of plastic — into a paste, then tints the mixture to whiten or match the color of your teeth. Several layers of resin are applied to each tooth. Each

layer is hardened under an ultraviolet light or laser. Final steps include shaping and polishing the resin material so the finished tooth looks natural and smooth.
