Subject: The key secrets to being your own boss

Hi (Name)

The true reason that you still have a 'normal' job is you have never taken risks, you start and get distracted.

Before I decided to escape the normal life I jumped from every dead end job you could imagine, rejected at 100's of job interviews. At this point I realised that I needed change and began my journey to financial freedom.

The great things in life don't come by luck, they only come from hard work. You need to develop the discipline to work on the days that you do not have the motivation to do it.

As part of this great community you will learn everything you need to know to achieve your dreams and have more money than you could ever possibly imagine.

PS: Big news coming soon!!
