

Overview of Video Editing Options

MarketU is the best solution for businesses looking for highly trained, in-house editors with a dedicated team and strong US-based management. It offers fast 24-hour turnaround, excellent customer service, and seamless Slack integration, making it ideal for agencies handling 20-40 projects per month. However, it requires an onboarding period before full integration.

For immediate one-off editing solutions, **ACE Video Editing** (Aerial Canvas team) and Pixlmob are the best options. ACE provides experienced editors, fast 24-48 hour turnaround, and dedicated project management but is slightly more expensive without a retainer. **Pixlmob**, on the other hand, offers a marketplace of rated editors with flexible pricing, though quality and turnaround times may vary.

Outsource Plug and Hiero Talent are cost-effective staffing agencies for those looking to hire part-time or full-time video editors at \$10-15/hr. However, it requires training and integration into your workflow, making it better suited for businesses handling 20+ projects per month.
