

Summary of ADZbuzz Change Release v1.0.2016.48.0

This release includes the following:

→ **New Feature: Sticky Links v1.0.0 (Admin Controlled) #22**

- ◆ ADZbuzz Admin can now easily add a sticky post to the Social and ADZbuzz Lounge feeds with a nicer look and feel that's automatically generated by only entering the link. Just like how it is when post via ADZbuzzer.
- ◆ Users will not only see the cosmetic benefits a more important benefit which will allow them to interact on the posted updates.
 - Clicking the sticky post will redirect to the comments page which allows for normal user interactions (liking, commenting, etc...)

→ **New Feature: ADZbuzzer Post reporting (flagging) directly from the main home page #74**

- ◆ When logged in, the user will now see the post interaction buttons -- (like button, and report button) in the comments page of any ADZbuzzer post.
- ◆ If the user has not reported the post yet, a "flag" reporting icon will be visible.
 - Clicking the "flag" report icon will open a confirm dialog for the user to confirm the action.

→ **New Feature: Activity Log #12**

- ◆ Users can now review their activity logs by going to `Settings -> Activity Log` from their back-office.

→ **Feature Enhancement: ADZbuzz Messaging & ChatBox #57**

- ◆ The message icon the top header will now display a preview of most recent messages and when one message is clicked, it will now open the chatbox as popover on the same page. Before this, clicking the message icon will simply open on the messaging page on a new tab or window specially when you are on the main home page.
- ◆ Before the each individual chatboxes show the oldest message and the user need to scroll down to view the latest message. Now, it automatically displays the latest message just like how it is with other social network chatboxes.

- **Feature Enhancement: Updated NEXT URL feature to correctly redirect user to the previous page visited that requires login whether from a SEO URL or not. #76**

- **Major Facelift on Groups and Pages page #10**
 - ◆ Mad the Groups and Pages landing page to having the same look and feel as the google communities page with the groups and pages that the user created, joined, like, and the system suggestions
 - ◆ This can now be accessed via `Timeline` -> `Communities` from the header. #77

- **Removed unnecessary items on the ADZcoin page. #40**

- **HOT FIXES:**
 - ◆ **Fixed issue on ADZbuzzer's post where the correct sharer is not detected correctly on the comments page when loading more comments. #53**
 - ◆ ***Fixed Internal Sharer issue where the shared post does not appear on the destination timeline (user, group or page timeline) specified by the sharer. #81***
 - ◆ ***Fixed Emoticons section on the main post box merely visible. #81***
 - ◆ ***Fixed error when the preview images on the categories section on the main homepage not being detected or displayed correctly. #83***
 - ◆ ***Fixed error on timeline pages which goes to an error page when access but not logged in. #52***
 - ◆ ***Fixed error on ADZbuzzer button which goes to a non-existent page (our sad face page) when clicked. #52***
 - ◆ **Fixed errors on Social Login buttons #69**
