I'm taking 3 coaches, and showing them exactly how to get an extra 10,000 followers within 90 days or less without showing your face on camera.

And no, you won't have to spend 5 hours a day to ideate, script, record and edit any of your content!

You can achieve this under 4-5 hours per week or in some cases not even doing it yourself!

One of my first clients went from 50K followers to 150K in 2 months and made over \$10K in the process without even selling anything.

I'm Anthony, I'm the founder and owner of [@uncover.ai](#) and the [Uncovering AI newsletter](#).

I started my young career in May 2023. Since then I've posted over 1100 pieces of content, gained over 70 million views, 300,000+ followers and gained over 20,000 email subscribers to my newsletter without spending a single dollar on ads or showing my face ONCE!

In my experience, most entrepreneurs believe they need to be a slave to the content machine to get clients and customers on Instagram...

When in reality, you can spend less than 1 hour a day on content creation and still be able to gain millions of views every month.

And all it comes down to is one thing:

A proven system!

If you want to avoid missing out on free views, followers, cashflow and become the go-to coach in your industry...

You can roll into our Undercover Creator Program.

Here's how it works

Phase 1: Foundation Setup and Market Research

Most entrepreneurs start creating content without having their account optimized for converting viewers into followers and followers into clients

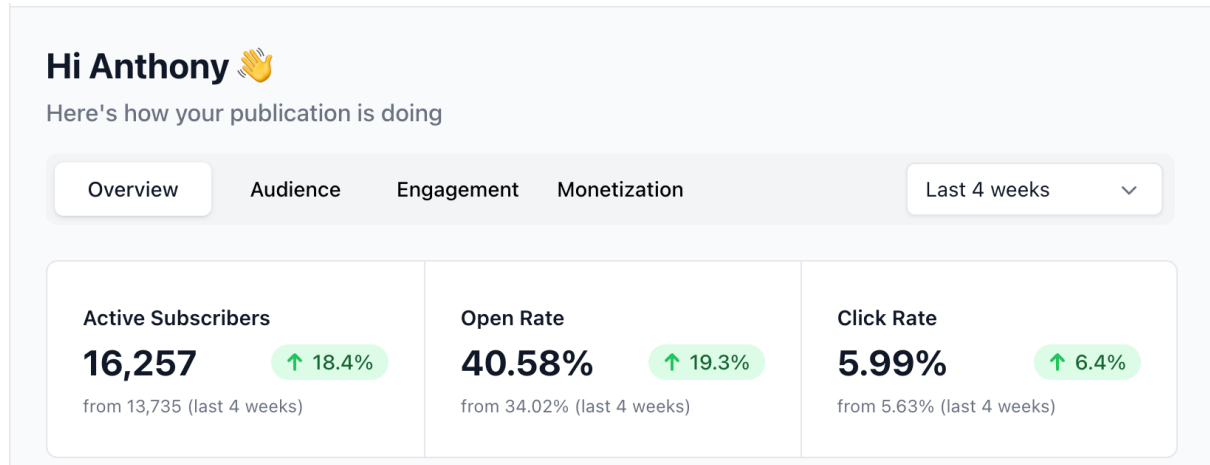

So, the first thing we'll do together is I'll have you fill in a form that gives me a clear understanding of your niche, offer and ICP.

Once that is done, we'll go through my "Secret Research Sheet" to GUARENTEE that your content not only is proven to go viral, but also converts.

Using the information from our research you will be able to:

1. Structure your profile so it's optimized for your target audiences needs and desires
2. Develop a winning content strategy that speaks to the heart of your audience

Once this is setup, we will deploy my “Passive Nurturing System” that allows you to passively turn your audience from RENTED TO OWNED by implementing my Passive Email Capture System that I’ve used to gather over 20,000 emails from my organic content.

LIFETIME TOTALS **7,774**
TOTAL SUBSCRIBERS

This means you will be insured that a view NEVER goes to waste!

Phase 2: Faceless Content Creation

Once that’s in place, we’re going to make it damn near IMPOSSIBLE TO NOT GAIN 100+ FOLLOWERS PER DAY.

We’ll install the “Undercover Content Formula,” that takes less than 15 minutes to create a viral worthy piece of content.

This allows you to pump out high-quality content at the fraction of the time-period without EVER having to record any footage whatsoever.

With this automated system in place, it’s IMPOSSIBLE to stop the leads coming in unless you “turn the machine” off.

And don’t worry. You don’t need to do the tech stuff.

We help you install all of my content templates in 1-click.

Phase 3: Double Down

Finally, we analyze, optimize and double down on the content that works and eliminate what doesn't.

The Outcome & Format

This process will give you the 2 Core Components of an Undercover Creator so you can gain followers quickly while doing less work.

1. **Optimized Profile and Systems (*Passive Leads*)**: Undercover Creators use the "Passive Nurturing System" that's built on my patented passive lead generator. This way of getting viewers, followers and leads ensures you don't waste your time getting views without making the most of them
2. **Your Faceless Content Machine (*100+Daily Followes*)**: Using my "Undercover Content Machine" that has gained me over 70,000,000 million views and 300,000 followers in 1.5 years, ensures that you will get guaranteed views and followers

Each of these components stacks onto the other, and together, we'll get them up and running starting 24 hours after you join.

At this point, you will enjoy a lean and easy-to-run Undercover Creator Profile with 10,000 followers in 90 days or less spending less than an hour a day on managing it.
