Step 1 - Image Creation

Create a premium, high-end portrait of yourself using Nano Banana 2.

Prompt: Ultra-realistic professional studio portrait of the same person, clean minimal background soft neutral tones (white/grey), high-end fashion photography, sharp facial details, natural skin. texture, soft diffused studio lighting, subtle shadows, centered composition, 85mm lens, shallow. depth of field, luxury magazine style, no distractions, no props, polished and elegant look.

Step 2 - Body Creation

Use this prompt to generate your character's body type. Use with an uploaded face/character reference image.

STRICT IDENTITY LOCK The subject must be identical to the face reference in [image1] — same face structure, same jawline, same eyes, same skin tone, same hairline, same hair styling. Zero identity drift from the established character.

CAMERA & LENS 85mm portrait lens, natural perspective, no distortion, ultra-sharp 4K detail.

SUBJECT [Describe your character: e.g. ethnicity, approximate age, body type — lean/athletic/average/stocky, and any defining physical traits. Keep it realistic and proportionate. Avoid exaggeration.] Natural musculature appropriate to the described build — realistic anatomy and proportions, not stylised or idealised.

FRAMING 3/4 body portrait — head to mid-thigh visible. Centered composition with the face clearly legible for identity cross-reference against [image1].

POSE Standing facing the camera, relaxed upright posture. Shoulders natural and level, arms resting gently at the sides. Weight evenly distributed, grounded stance — confident but unstaged. No fashion posing, no tension.

WARDROBE [Describe outfit: e.g. simple neutral athletic wear / casual streetwear / plain fitted tee and trousers.] Minimal branding, clean lines, neutral tones. Clothing should reveal body proportions without being overly tight or distracting from the reference purpose.

HAIR [Hair colour and style — must match exactly what is visible in image1.] Consistent with the established character design from [image1].

EXPRESSION Neutral and relaxed, subtle confidence. Calm direct gaze into the camera — consistent with the front-facing expression from [image1].

LIGHTING Soft diffused studio lighting, evenly illuminating the full body and face with minimal shadows. Consistent neutral colour temperature. Enough definition to show body contours without dramatic sculpting or harsh falloff.

BACKGROUND Plain neutral studio tone [e.g. cool gray / muted charcoal / warm off-white], smooth and uniform, zero distractions. Consistent with the face reference background in [image1] if applicable.

STYLE & QUALITY Extremely photorealistic, natural skin texture with visible detail, realistic anatomy, documentary realism. 4K ultra-detailed output, sharp focus on both the eyes and body proportions. No stylisation, no idealisation.

NEGATIVE PROMPT Wide-angle distortion, exaggerated musculature, glamour pose, fashion editorial lighting, stylised illustration, CGI appearance, plastic or airbrushed skin, anime influence, identity drift from face reference in [image1], different face or hairline, oversaturation, dramatic shadows, branded logos.

Step 3 - Video Creation

Use this prompt to along with the generated images in OpenArt (Seedance 2.0) - [Click for Tool](#)

Visual Style

Extremely detailed physical textures: cracked asphalt, rusted metal, concrete debris, broken glass, scorch marks. Smoke, sparks, and burning wreckage fill the ruined city street. Neon green reflections shimmer through dust and firelight. Lighting is realistic with strong depth of field and foreground blur. No magic effects, no subtitles, only mechanical impacts and physical destruction.

Main Character @image_2 @image_3

Asian adult male based exactly on for face and for full body and clothing. Face 100% matched. Grey oversized tee, black cargo pants, black chunky sneakers, silver chain necklace, clear-frame mirrored sunglasses. Clothing is torn with clear battle damage, face covered with dust and blood. His expression is focused, calm, and determined.

Mecha Armor

Full-body tactical mecha suit based exactly on @image1. Matte dark charcoal black armor panels with glowing neon green circuit lines running along every panel seam, joint edge, and limb. Monster Energy three-claw slash logo glowing green on the chest plate. Smooth sealed helmet with a narrow green-lit visor slit.

Every armor module strictly matches normal adult male body proportions — no giant scaling, no distortion. Brushed dark alloy with surface scratches and battle wear. All parts are real physical modules that remain visible once attached. Sparks fly at every magnetic snap point during assembly.

Enemy

A pack of grey-black hunting beasts with rough skin, steel claws, and glowing red eyes. They attack rapidly in coordinated waves from multiple directions.

0–1s — @image2 @image3 Hero is already mid-sprint down a ruined elevated highway, Monster Energy can in right hand @image4, monsters closing in fast from behind and both flanks. A bus burns on the left. Fire and debris scatter the road.

1–2s — Trigger He crushes the Monster Energy can. Neon green liquid sprays outward. A signal burst pulses outward — armor modules launch toward him at high velocity from all directions.

2–3.5s — Foot & Leg Assembly Boot modules slam onto both feet and lock up his shins. He stomps a lunging monster into the asphalt and launches eight meters forward. Leg plates then seal around his thighs and hips mid-leap.

3.5–5s — Waist & Torso Assembly Hip and abdominal panels snap into place as he pivots off a concrete barrier. Rib plates lock around his torso while he slides under an overturned truck.

5–6.5s — Chest, Back & Arms Chest plate and spine armor snap closed simultaneously. He blocks a monster claw strike — sparks fly off the new plating. Arm, elbow, and forearm modules slam on in rapid sequence. He clenches his fist. Green circuits blaze to life.

6.5–7.5s — Helmet The black helmet drops and seals over his head from above. Green visor illuminates. Monster Energy claw logo pulses once on the forehead.

7.5–10s — Counterattack Fully armored, he spins and blocks two simultaneous monster strikes, hurling one beast into a burning vehicle twenty meters away. Debris erupts on impact.

10–12s — Final Strike He charges the largest beast, grabs its joint, and delivers a full-force palm strike. The creature slams into the cracked asphalt. Dust and blood spray outward.

12–15s – Final Strike

He dashes forward, grabs a monster's joint, and delivers a full-force palm strike to its chest. The creature crashes into the cracked asphalt, blood and debris erupting on impact. The hero slides into a half-kneeling pose, one fist on the ground, as smoke and fire rise behind him. Green circuits dim to a slow pulse. Stillness.
