All images, unless otherwise stated, are screenshots from the videos cited. All Eastern Time Zone timestamp sources and/or calculations are explained below each incident entry.

Parler Footage Timestamps:

For the time being, the times we have listed for the Parler footage adhere to the current convention that the creation time of Parler footage is the start time. However, we have reason to believe that this may not (always) be the case. We are researching this further, but for the time being, all Parler footage times listed are assumed to be the start time of the video.

Security Camera Footage:

We are in the process of updating this timeline to align with newly released security footage from the Capitol Interior. We will note in the document below whenever an adjustment is made.

Nomenclature / Hashtags: This timeline uses suspect hashtags as defined on the Capitol Suspects Database bit.ly/CapitolSuspectsData.

We the People must take to the US Capitol lawn and steps and tell Congress #DoNotCertify on #JAN6! Congress cannot certify this fraudulent Electoral College. Our presence in Washington D.C. will let Members of Congress know that we stand with Rep. Mo Brooks and his colleagues in the House of Representatives who will bravely object to the certification of the Electoral College. We're in need of at least one Senator. We've identified six (seven including Senator-elect Tommy Tuberville) that could join our cause. StopTheSteal.us is working closely, whipping the vote up, with patriots in the Congress.

There is a growing body of evidence that those in attendance on January 6th had been instructed to arrive early by 7am, and on the day multiple rallies and marches were organized with a common goal to “#StopTheSteal” On January 3rd, after the President expressed his desire to be involved, united under the umbrella “March to Save America” the events added a march and a protest at the Capitol at 1pm to their events list (More [here](#))

In advance of Jan 6th [someone](#) compiled two guides to the key events taking place on Jan 5th and 6th at these various events, rallies, and marches. Note that there is a “March for Trump” which begins at 7:00am on the Ellipse, and, seemingly in answer to Trump’s Dec 19th’ tweet, a “Wild Protest” from 10am-5pm on Capitol Grounds. We're going to walk down to the Capitol, and we're going to cheer on our brave senators, and congressmen and women. 12:27pm to 12:55pm - Crowds begin to flock to the Capitol, despite Trump's speech continuing on until 1:11pm:

Some, possibly having attended a different rally on the NE Lawn, are lining up all along the barricades, filling in the fringes of the East Plaza.

I've clustered the footage of the streets and East Plaza here. Some of the early West side is in the timeline at breach points. I am still trying to figure out the best organization for this.

12:40pm - Bomb discovered near the RNC

Just a few blocks from the Capitol building, a pipe bomb is discovered in an alley adjacent to the RNC by a woman going out to collect her laundry. The timer is set to detonate in 20 minutes, which would be at 1pm.

The woman runs for help. The city block is evacuated, and the bomb is destroyed with water cannons before it can detonate. Thirty minutes later, a similar device is discovered near the DNC. It is also destroyed.

The FBI [has reported](#) that the timers used were kitchen timers. As we know the bombs were planted the night before, it appears that they *may* have been intended to detonate the night before, but the timers were faulty.

Sidenote: it seems strange that BOTH timers would have been faulty.

At 12:48 pm, group of Proud Boys (including leader Joe Biggs), Oath Keepers, coordinated groups marked with #orangetape, or #greentape and other protestors converge at the Peace Monument on the NW side of the Capitol. Joe Biggs (wearing a black and white jacket that day) is seen talking with suspect #WhiteHoodie (now identified by authorities as Ryan Stephen Samsel).

Joe Biggs has a bullhorn and is yelling "F*ck Antifa." #MoreTreesGuy, also with a bullhorn, incites the crowd with "This is Our Capitol!" People chant "Whose House? Our House?" and "We Want Trump!" and "Let's Go!"

The mob is being primed to move.

~12:55pm - First Barricade Breach - Pennsylvania Walkway

Spurred on by the bullhorn speaker, and led out by #WhiteHoodie carrying a flag, the crowd marches from the Peace Monument toward the Capitol, arriving at police-lined barricades blocking the path. As they crowd the barricade, one protestor on a bullhorn yells at police to "Move! It's Our House!" The police try to hold the mob back, but they are soon overwhelmed. Fighting breaks out, an officer is knocked to the ground, the barricades fall, and the protestors move on to the next set. As they march onward, knocking aside an unmanned barricade, the Proud Boys, siegers with #OrangeTape, #Spazzo, and #Individual4 will join them at the front lines. The approximate time of the breach is 12:54:52pm Eastern, according to primary source calculation.

The instigators of this breach will become known as #breachteam6.

Suspects Present: #JoeBiggs, #MaroonPB, #WhiteHoodie, #bigmagacamo, #YoungSkullMan, #OldTexasHelmet

However we have calculated it a bit later:

First Barricade Breach Video

TIMESTAMP CALC 1: The 11:14 minute mark on the Status Coup video (<https://drive.google.com/file/d/1OpWmBRq2kAZvERiFaahjaSRhvCT3dYkt/view>) seems to align with the 0:56 minute mark on this Parler (<https://projects.propublica.org/parler-capitol-videos/?id=LdowRJbSeiWb>). The Parler footage has a start-time of 12:56:19 Eastern. This means that the moment of alignment is 12:57:15 Eastern and the start-time of the Status Coup would be 12:46:01. As a reference point, note the sound of a very loud horn blaring in both sets of footage. **Because this sound alignment is the more concrete of the two alignments I have calculated, this is the one I have chosen to use for this footage.**

TIMESTAMP CALC 2: At the 8:07 minute mark, this footage appears to align with the 0:14 minute mark in Parler (<https://projects.propublica.org/parler-capitol-videos/?id=7h0ZDIfUOgbQ>) which has a starttime of 12:53:56 Eastern. As a point of reference, note that the man with the flag and the bullhorn has just crossed paths with #BlackSkiMask, his leg is extended, and his flag is starting to flap up. Thus, the moment of alignment is 12:54:10 Eastern, and the starttime of this footage would be 12:46:03 Eastern.

IMPORTANT TIMEPOINTS: First Barricade Breach -- The 8:51 minute mark in this footage marks when the barricades have fallen and the police have turned and are running to fall back to the next set of barricades. I have chosen the moment that a man carrying a set of double flags reaches the top of the steps after climbing over the fallen barricades as the timing of the first breach. I chose this moment because it is a distinct visual that is easy to see from a distance and therefore may be useful for others to use in timing other footage. This minute mark pins the time of the First Barricade Breach at 12:54:52

Alternate times:

In this article (<https://www.nytimes.com/interactive/2021/01/12/us/capitol-mob-timeline.html>) NYT cites these videos from Elijah Schaffer as a source for the timing of the first barricade breach. I do not know how they arrived at the timestamp of 12:53pm Eastern, thus far we have assumed the timestamp is accurate, but we have now found Parler footage that slightly conflicts with that timestamp.

Also: These time stamped photos by Amy Harris pin the time of the barricade breach sometime between 12:53:33 and 12:54:51. If we decide that these timestamps are more reliable, or can narrow further, we will recalculate the barricade breach times.

12:54-12:55pm - West Lawn Fence Breach

At the exact same time that the Police Barricade is being breached on Pennsylvania Walkway by #WhiteHoodie and crew, others, including #Individual4 and #BlackSkiMask, have crossed over onto the West Lawn itself. #BlackSkiMask removes a fence from the west side of the West Lawn and encourages the crowd to come onto the grass. #Individual4 waves a flag and appears to wait for #BlackSkiMask. The two march across the lawn, following the fence lining the path from the Peace Monument to the West Plaza. Soon they will join the front lines for the second barricade breach. A woman on a bullhorn cheers people on, shouting "Patriots! Patriots go!"

#NWScaffoldCommander and #MasterSarge cross onto the West Lawn? (This last statement needs a source citation).

Suspects Present: #BlackSkiMask, #Individual4, #NWScaffoldCommander, #MasterSarge

12:55pm - Fences lining the sides of Pennsylvania Walkway are dragged aside

Just seconds after the first barricade breach, someone (are we officially calling this guy #BlueBag?) drags and tosses aside the metal barricade lining the side of Pennsylvania Walkway - clearing an access point for any who want to cross on to the West lawn. About thirty seconds after that, #NWScaffoldCommaner and others tug down the plastic fencing lining Pennsylvania Walkway closer to the West Plaza.

~12:56pm - Maryland Walkway Breach

This timestamp has yet to be calculated precisely. Approximately one minute after the first police-lined barricade was breached on Pennsylvania Walkway, rioters also ventured down Maryland walkway. We have located very little footage of this breach and what we have located is from a distance. We have not been able to establish whether or not there was a police presence at the barricades across Maryland Walkway, or if the crowd was easily able to simply set them aside - following the lead of the Pennsylvania Walkway breachers.

12:56pm - Second Barricade Breach on Pennsylvania Walkway

After breaking through the first barricade, the crowd rushes onward along Pennsylvania Walkway toward the Capitol. #Breachteam6 and others charge the barricades at the base of the West Plaza. The police fall back, and this barricade is ripped down even more quickly than the first. Meanwhile, the Proud Boys and #Individual4 emerge on the front lines. The Second Barricade breach we have pinned as the moment that William Pepe tosses aside the barricade section. This occurs at 12:55:46pm. Now the only barricade left between the rioters and full access to the West Plaza is the black fence blocking the stairs which run the length of the plaza. It won't be there for long.

Suspects Present:

#BreachTeam6, #MAGAreWhiteCoat, #FashyFreddyMercury (now identified by authorities as Will Pepe) #BlackSkiMask, #Individual4, #Spazzo (known to authorities as Dominic 'Spaz' Pezzola), #WhiteHoodie (now identified by authorities as Ryan Stephen Samsel), Proud Boys, #orangetape

TIMESTAMP CALCULATION:

Status Coup - BREAKING Video

TIMESTAMP CALC 1: The 11:14 minute mark on the Status Coup video (<https://drive.google.com/file/d/1QpWmBRq2kAZvERiFaahjaSRhvCT3dYkt/view>) seems to align with the 0:56 minute mark on this Parler (<https://projects.propublica.org/parler-capitol-videos/?id=LdowRJbSeiWb>). The Parler footage has a start-time of 12:56:19 Eastern. This means that the moment of alignment is 12:57:15 Eastern and the start-time of the Status Coup would be 12:46:01. As a reference point, note the sound of a very loud

horn blaring in both sets of footage. **Because this sound alignment is the more concrete of the two alignments I have calculated, this is the one I have chosen to use for this footage.**

The Second Barricade breach we have pinned as the moment that William Pepe tosses aside the barricade section. This occurs at the 9:45 minute mark in the Status Coup Video, therefore this corresponds to a real time of 12:55:46pm.

OLD CALCULATION

The timing of this breach was calculated by assuming a 12:53pm time for the first barricade breach as per the NYT article (<https://www.nytimes.com/interactive/2021/01/12/us/capitol-mob-timeline.html>). Do note that while NYT uses this video from Elijah Schaffer (https://www.youtube.com/watch?v=fpNHAuw-K_k&t=17m15s) as a source, I do not know how they arrived at the Eastern time zone timestamp of 12:53pm. I am going to assume that their information is accurate. For my purposes, I am pinning the moment of "First Barricade Breach / 12:53pm" at the 18:30 minute marker in the video. This is when you see people over the barrier and beginning to sprint up the steps. As the video continues, the mob moves on toward the second set of barricades at the end of Pennsylvania Walkway near the West Capitol Plaza. The second barricades are cleared away by the mob by the 20:00 minute marker, approximately 1 and a half minutes after the first barricade breach, and people climb up the steps, thus pinning this breach time at approximately 12:55pm.

12:56pm - West Lawn Fence is Trampled

After the first police-manned barricade breach, with the insurrectionists running toward the Capitol, people along the far west side of the West Lawn cheer them on. Several stomp the plastic fencing and cross onto the lawn. Others cross over at the breach point #BlackSkiMask made earlier. Still others verbally rebuke these early breachers as being in the wrong.

12:57pm - Mob Floods the Lower West Plaza

The crowd (coming now from both the Peace Monument path and directly across the West Lawn) quickly fills in the lower space on the Lower West Plaza, pressing close to the police officers and the black fences and barricades which span the plaza from north to south along the steps. Groups of people with #OrangeTape strapped to their helmets, arms, and legs - possible signs of coordination. #Sean59AFO exhorts the crowd with a bullhorn.

In total, it is estimated that the crowd at the Capitol could have been several thousand or 10,000 that day, but likely not close to 100,000 ([Source](#)).

Suspects Present: #FashyFreddyMercury, #Spazzo, #Individual4, #CampAuschwitz, Joe Biggs
#breachteam6, #Sean59AFO

Given that the walk from The Ellipse to the Capitol grounds is about 1.5 miles, she would have needed to leave the speech only 15-30 minutes into it in order to arrive at this time.

MORE SOURCES:

This Parler video, timestamped 12:59pm (<https://projects.propublica.org/parler-capitol-videos/?id=aRWTR7sk7i90>) reveals that the black fences are gone as compared to at the 1 minute mark (real time would be 12:57pm) of the Parler video (<https://projects.propublica.org/parler-capitol-videos/?id=LdowRJbSeiWb>). So these fences were knocked down/moved somewhere between 12:57 and 12:59pm.

This video from Status Coup is continuous footage from the moment of first barrier breach, through the second, and on to this fence breach (<https://www.youtube.com/watch?v=dGyEhnhGdw>). Original has been removed, but is archived here: https://jan6archive.com/youtube/_dGyEhnhGdw.mp4 and here: <https://drive.google.com/file/d/1U1qZ3xK8yHeJwBk43fxzRDI56WND83UZ/view>).

In the video, the black fence breach occurs at the 12:32 minute mark, which corresponds to 12:58:33pm.

12:59pm - Rolling Up Fences on the West Lawn

Someone runs along the West Lawn rolling up the plastic fencing so that people can access the far side of the lawn. There is little room left in the Plaza itself.

Video: <https://www.youtube.com/watch?v=YzxvVi8wkrU>

Timestamp Calculation: This is a rough estimate. In the distance of the fence rolling video, the media tower can be seen with one person climbing it. By this Parler video (<https://projects.propublica.org/parler-capitol-videos/?id=bHrrdOH7wawk>) timestamped 12:59:27, the first two people climb the media tower. The tower filled in very quickly after. Therefore the fence rolling must have taken place at approximately 12:59.

1:00 - 1:30pm

1:00pm - Bomb *may* have been set to detonate at the RNC

The pipe bomb set to detonate by the RNC **may or may not** have been set to detonate at 1pm.

The woman who found the bomb at 12:40pm said that there were 20 minutes left on the timer. The bomb was destroyed by authorities using water cannons before it could detonate. Another bomb discovered at the DNC was also destroyed prior to detonation. Its designated detonation time is not publicly known.

However, the FBI [has reported](#) that the timers used in the bomb were kitchen timers. As we know that the bombs were planted the night before, and kitchen timers are typically 60 minutes, it appears that the bombs **may have been intended to detonate the night before**, but the timers were faulty.

Sidenote: it seems slightly odd that BOTH timers would have been faulty.

1:00pm - Climbing #MediaTower (Central Scaffolding) in West Plaza

As the crowd in the West Plaza grows, at least two people climb the Central scaffolding (the media riser), including what looks to be someone (Proud Boy?) with a large pack. Moments later, others follow - including the #NWScaffoldCommander. Some of these climbers may be photojournalists or regular rally goers. Others are looking for a high point to observe everything and help orchestrate what is about to happen on ground. Those climbers will have radios, walkie-talkies, earpieces, and bullhorns / megaphones to give and receive commands.

Soon, the #NWScaffoldCommander will be inciting the crowd from above with a bullhorn / megaphone.

1:05pm - The opening of the Joint Session of Congress to certify the Presidential vote

With a growing mob of protestors swelling in the West Plaza below, the Senate and House of Representatives meet in a joint session of Congress (in House Chambers) to certify the election.

Presumably some in the crowd have been holding out hope that VP Mike Pence would in some way intervene last-minute in the election certification. As time passes, it will become clear that this is not going to happen, and this may make some protestors angrier.

1:10pm - Trump concludes his speech by saying:

"We fight like Hell and if you don't fight like Hell, you're not going to have a country any more.... So we're going to, we're going to walk down Pennsylvania Avenue, I love Pennsylvania Avenue, and we're going to the Capitol and we're going to try and give ... The Democrats are hopeless. They're never voting for anything, not even one vote. But we're going to try and give our Republicans, the weak ones, because the strong ones don't need any of our help, we're going to try and give them the kind of pride and boldness that they need to take back our country. So let's walk down Pennsylvania Avenue. I want to thank you all. God bless you and God bless America. Thank you all for being here, this is incredible. Thank you very much. Thank you."

The speech ends at 1:11 p.m.

1:27pm - Lone Wolf Attacks or coordinated efforts in the West Plaza?

While most protestors are holding back, a few charge the barricades.

One man tries to back into the barricades, but is shoved forcefully off by the police. When a protestor in a pink gas mask guides him back to the barricade to push again, the police pull him up and over the barricade and isolate him.

Incidents like this could be truly lone wolf attacks, or they could be orchestrated by the siege planners, and the presence of someone directing the fence pusher to go back and push again may indicate the latter.

**1:48pm (approximately) - Mob breaches the police line
beneath the north scaffolding - gaining access to the NW
Steps**

The mob presses against the police line in the doorway beneath the north scaffolding. They break through the line and surge beneath the scaffolding and up the NW Steps (which the scaffolding is positioned atop). Twenty seconds after the police line breaks, #Spazzo passes through the doorway and begins to ascend the steps.

The second photo, by photographer Lev Radin, appears to show Dominic "Spazzo" Pezzola framed in the gap, beginning to climb the NW stairs beneath the scaffolding. In less than an hour, #Spazzo will be the first to break a window in the building and gain entry to the Capitol Interior. Photo Timestamp: 1:46:52pm

Suspects Present: #Spazzo, (#WhiteHoodie and #Individual4 are nearby but I do not see them in this shot) #3Pers

More footage of the breach:

<https://www.youtube.com/watch?v=P34tO5eaLhg&t=21m22s>

Timestamp notes:

There is a slight discrepancy between the two timestamp sources. Parler footage pegs this breach occurring at 13:49, while a timestamp based off of Lev Radin's photography places it at 13:46.

Further notes on the calculated timestamp:

Minute-mark 21:41 of this video (<https://www.youtube.com/watch?v=P34tO5eaLhg&t=21m41s>) aligns with this photo from Lev Radin (<https://www.pacificpressagency.com/preview/1300772>) timestamped 1:46:52pm. The initial police line breach occurs 19 seconds prior to that point, so the police line was breached at 1:46:33pm. Note that Lev Radin's camera does not account for the "fall-back" time change in autumn. Therefore in all our calculations, we adjust his publicly posted timestamps by exactly one hour.

1:48pm (approx) - #Individual4 and an accomplice slice a second breach into the white material covering the scaffolding.

Shortly after the police line in the door under the scaffolding is breached, and a mob swarms up the NW Steps, #Individual4 inspects the white material on the scaffolding. A knife stabs the material from the inside, slicing down. Once the first cut is made, the knife wielder hands their knife to #Individual4 who tries to make a second cut, but doesn't have success. Individual4 hands the knife back to the person behind the white material, who slices a cut along the bottom to form a doorway. There is some communication between these two and interestingly, #Individual4 does not immediately go through the opening onto the steps, but instead goes back into the crowd seemingly to alert others that there is a new way inside. Soon #WhiteHoodie appears and follows #Individual4 through the gap. Other rioters continue to cut down more and more of the white fabric. They are still ripping through them in a Parler video at 2:04pm.

Video of scaffold covering being cut:

And similar at: <https://projects.propublica.org/parler-capitol-videos/?id=p7xcGbF3C4w0>

TIMESTAMP ESTIMATION:

In this footage: <https://intelx.io/?did=53a5f886-b61f-4227-9524-008dd70c2540> the knife cutting the scaffold material appears at 1:05:00. This video is continuous and it shows the first barricade breach occurring at 0:08:45. As the first barricade breach was reported by the NYT as occurring at 12:53pm, the scaffold cutting incident therefore occurs at 1:50pm.

ORIGINAL TIMESTAMP ESTIMATION: We have narrowed this timestamp to a very limited range. Minute-mark 21:41 of this video (<https://www.youtube.com/watch?v=P34tO5eaLhg&t=21m41s>) aligns with this photo from Lev Radin (<https://www.pacificpressagency.com/preview/1300772>) timestamped 1:46:52pm. (Note the position of #Spazzo framed in the doorway as well as the arm position of the officers to the right of the doorway). At that point in the video and in the photo, the white material remains un-cut. However just over two minutes later, at minute mark 24:08, we can see that the material has clearly been cut, and at 24:11 we see what is presumably #Individual4's knee poking out as they stand on the scaffolding, continuing to cut.

2:09 - NW Steps Landing Breached - Access to Upper West Terrace

Insurrectionists -- including #Spazzo, #Individual4, #AxeHole, #NeongingerNS, #OldFashNS and others -- have been amassing beneath the north scaffolding on the NW Steps for over 15 minutes, but have been blocked halfway up the steps at the landing level by police. At 14:05:12, the mob breaches the police line along the upper set of steps and surges up the final flight of the NW steps onto the Upper West Terrace. In under 10 minutes, they will breach the Capitol through a window in the NW Courtyard on the Upper Terrace.

Parler Video of mob rushing up the final flight of NW Steps (at about the 0:23 mark):

https://d2hxnssq7ss7g.cloudfront.net/U4cg0Dfgtz12_cvt.mp4

Though the camera does not capture the initial moment the surge begins, you can see the stairs empty initially, then hear the reaction of the crowd at 0:23 as they erupt in cheers and an exclamation of "They're makin' it!" this is presumably the moment that the mob breaks through to the upper set of steps and is visible to the crowd. Finally the camera pans back around again, and you can see the mob sprinting up the stairs. This video begins at 14:04:49, thus the moment people are seen sprinting up the stairs appears to be 14:05:12 - which is very close to JaydenX's timing for this breach.

Police Breach on the NW Landing (at ~38:53 minute mark):

<https://www.youtube.com/watch?v=P34tO5eaLhg>

This footage shows much of the interaction along the police line at the NW Steps Landing. At around 34:00, the Landing is breached, but the rioters do not appear to get very far. At 38:53 the videographer exclaims that "they are going in" (by which he means the people on the landing have breached the landing completely and are moving up the Upper NW Steps -- the final set of steps to the Upper West Terrace).

A Timestamp Calculation, with a caveat:

The 21:04 mark in this JaydenX video (<https://www.youtube.com/watch?v=P34tO5eaLhg>) aligns with the 0:01 mark of this Parler video:

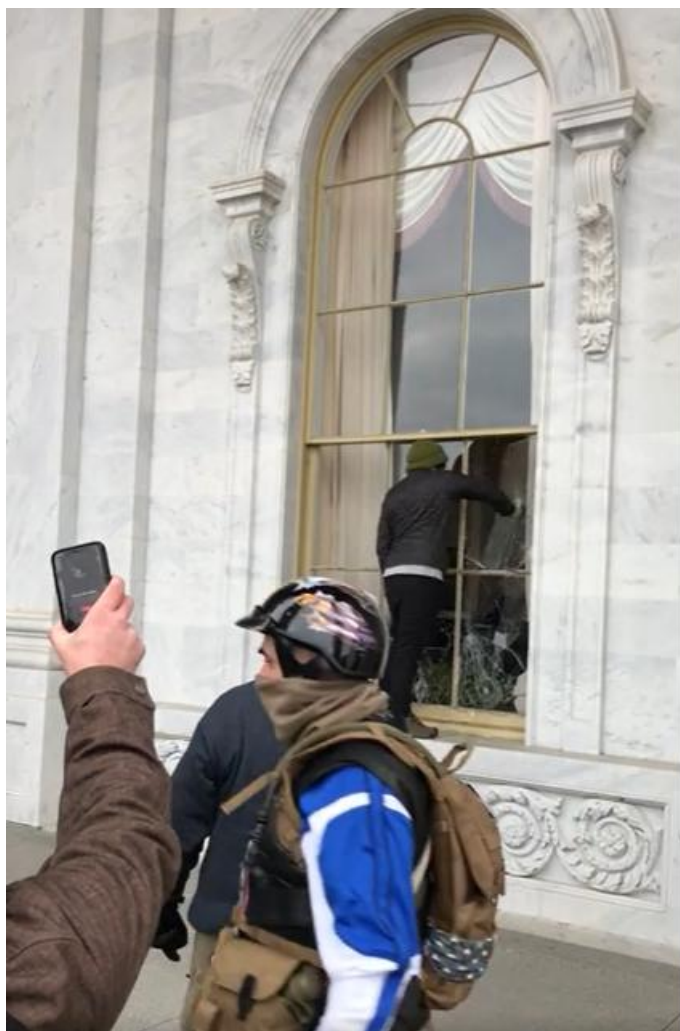

<https://projects.propublica.org/parler-capitol-videos/?id=zOZ8CgfNU1SY> which is timestamped 13:48:52.

Thus the JaydenX video begins at 13:28:48. As a point of reference, note the timing of the person on the bullhorn chanting "Who do you serve?" for the last time prior to the NW Steps being breached.

Important Times: At 38:53 the videographer exclaims that “they are going in” (by which he means the landing has been breached and the mob is going up the steps). If the video were continuous, this would have been 14:05:08, which aligns with the Parler time calculation of the breach being at 14:05:12. So it does appear that the cut in his footage is not very long.

However -- When aligning this footage with CCTV footage from the Capitol, it was discovered that the CCTV is ahead by approximately 4 minutes. Thus - if we go by CCTV footage time, this landing was breached at 2:09pm.

Archive of key CSPAN footage:

Mike Pence appears to have been evacuated just one minute before the Proud Boys came up the interior steps near the Senate and Officer Goodman redirected them.

Apparently if they'd arrived one minute faster, the mob would have seen Pence going into hiding.

<https://www.washingtonpost.com/investigations/2021/01/16/video-timeline-capitol-siege/?arc404=true>

However Parler Footage puts the first encounter between Goodman and the mob at 2:16 ... reaching the Senate level at 2:17:30ish.

We need to resolve the discrepancies between these accounts.

2:14pm - Proud Boy Joe Biggs enters the Capitol through the doors in the NW Courtyard

Shortly after #Spazzo breaks an adjacent window with a riot shield, fellow Proud Boy Joe Biggs enters the Capitol Building via a door someone opened from the inside (presumably after crawling in via the broken window). Biggs says "This is Awesome!" as he walks toward the Senate Chambers.

2:16pm - Officer Eugene Goodman diverts rioters from entry to the Senate Chamber

Using facial recognition, exclusive, unpublished video and interviews with lawmakers, The Post reconstructed the chaos inside the seat of government.

A mob, including Spazzo, heads north toward the Senate. They encounter Officer Eugene Goodman and demand to know "Where they counting? Where they counting the votes?" They then chase the lone officer up the stairs toward the entry to Senate Chambers.

In what appears to be a heroic, split-second decision, Officer Eugene Goodman distracts a group of rioters who had been chasing him. He diverts their attention and leads them away from the door to the Senate Gallery (where the Senators were still present - they had had no time to evacuate), and around the corner to where a police line has already formed.

Suspects Present: #Spazzo, Man with the Q shirt leading people to chase Officer Goodman. Q Shirt man was later arrested.

2:25-2:28pm (approx) - A Mob Rushes Police in the Capitol Crypt

Using facial recognition, exclusive, unpublished video and interviews with lawmakers, The Post reconstructed the chaos inside the seat of government.

After amassing in the Capitol Crypt, insurrectionists fight with police in the Capitol Crypt (an arched room directly below the iconic Rotunda). After a few skirmishes, a woman on a bullhorn begins shouting "Walk them back!" and the mob surges forward, clashing violently with the police line and rush into a sprint, forcing the police back.

Timestamp Discrepancy:

The Washington Post, using BGOnTheScene's footage listed above, says that this moment in the Crypt occurred at 2:25pm. We do not know how they arrived at that timestamp. Elijah Schaffer's footage (also listed above) was tweeted at 2:28pm, but may not have been tweeted immediately after recorded. I would prefer to pin down the timestamp of the primary source rather than rely on WashPo's number.

2:25pm - Central East Door Breached Briefly

2:38pm - Central East Door Breached

Using facial recognition, exclusive, unpublished video and interviews with lawmakers, The Post reconstructed the chaos inside the seat of government.

First Opening of the Central East Doors: ~ 2:25 to 2:28:25pm

One of the Central East Doors was opened briefly at approximately 2:25pm. Officers quickly shut the door again. The timestamp was roughly calculated by the footage [RMG - Caught on Camera](#), wherein a Rotunda clock displaying the time ~2:25pm can be seen moments before the camera shows the Central East Doors opening (at around the 7:53 mark).

In the [RFIRN](#) video we see that one door was first opened at the 37:47 minute mark. The RFIRN video doesn't show the doors the second time it happened but [this video](#) does. We decided that the moment the door was opened the second time was when the girl with the bullhorn had chanted "We want Trump" one time. This happened at the 51:26 minute mark in the [RFIRN](#) video which is 13m 39s after the first time.

[Below](#) we will show that the door was opened the second time at 2:38:31pm. If we subtract 13m 39s from this we get that the door was first opened at 2:24:52pm (~2:25pm).

Three other timestamp calculations corroborate this approximately 2:25pm first-opening time. Details will be summarized and provided soon (or on request).

When was the door closed again?

The best source to estimate how long the door was open before Capitol Police managed to close it is the [Portland Andy](#) video since it shows the moment the door is closed (39:58 minute mark) which gives us that the door was open for 3m 24s. Since it was a bit unclear *precisely* when the door was opened we can settle that the door was open for approximately 3m 25s and closed at 2:28:25pm.

It seems approximately 20-30 insurrectionists entered before the doors were blocked by police officers on the exterior and closed again. (Per [Security Footage](#) and [RMG - Caught on Camera](#))

Second Opening of the Central East Doors: ~2:39pm

When was the door opened again?

Both doors are opened again approximately 13m 43s after the door was first opened. Added to the approximate time of 2:25pm for the first opening, this gives us the time of the second opening as 2:38:43 This could be off by a few seconds since the camera in neither [Portland Andy](#) nor the [RFIRN](#) video focus on the exact moment of the door opening (in the latter video, the door opening occurs off screen between the 51:21 minute mark and the 51:33 minute mark - though you can see it begin to open at 51:21).

This video is also very helpful to watch for timing and shows a compilation of several videos: <https://www.youtube.com/watch?v=Mkm41FMH39g&t=38m>

Also of note: we had long suspected that the doors were opened with assistance from insurrectionists on the inside, which is what led us to research this door breach further. This indictment indicates that we were correct - several insurrectionists who were already in the building helped open the Central East Doors from the inside out:

Video of Both Breaches from Exterior:

<https://www.youtube.com/watch?v=Mkm41FMH39g&t=38m>

ORIGINAL POST & LINKS – THIS WILL BE REVAMPED WHEN WE HAVE COMPLETED OUR RESEARCH:

There is some uncertainty as to which footage shows the first opening of the East Doors. The Washington Post stated that the East Doors were first breached at 12:25. While they do not cite a primary source for this timestamp, this time fits with this "Caught on Camera" video (<https://www.youtube.com/watch?v=V-fkunG5J6k&t=8m>) where we can see a glimpse of the Rotunda clock just before the door breach, and it appears to be approximately 2:25. A man from the Rotunda wanders over to the East Door, and he and a few others assist the mob outside in fully opening the door (the mob appears to have inched the door open but one police officer kept it from opening fully). Did those who are on the inside assisting come from the NW Courtyard breach, or did they come from outside the East Doors?

Note that per Parler (see footage listed below), the East Doors appear to have been opened and closed multiple times.

THE EAST DOOR BREACHES ARE UNDER INVESTIGATION. We need more footage and analysis to determine exactly how, when, and by whom these were opened. If you would like to see our latest thinking on this topic, please follow [this thread](#).

Caught on Camera (from 8:00) <https://www.youtube.com/watch?v=V-fkunG5J6k&t=8m>

The 2:25 timestamp also aligns with Parler footage which shows the doors closed at 2:23 (https://twitter.com/donk_enby/status/1357039949225287684?s=20 **) and open at 2:25 (** <https://projects.propublica.org/parler-capitol-videos/?id=S29LhLxq15M9> **).**

However, later on the doors appear to be closed again (here at 2:35: <https://projects.propublica.org/parler-capitol-videos/?id=535LGMMm0KtE>).

<https://twitter.com/BGOnTheScene/status/1346931119363665923?s=20>, ... but when is this moment?

We haven't determined that yet, but it appears to be a second, later opening of the doors

Exact breach time not determined. It has not been confirmed whether this can be considered a proper breach or not. The officers appear to be standing back and granting access to the mob. Officers may have opened the doors, or allowed them to be opened. At this time, the Capitol had already been breached, so officers may have made a decision not to barricade this particular door.

The staircase near this door is a common public route on Capitol tours, and therefore is likely easily secured -- a good route to use to distract the mob, perhaps.

2:36pm - Police in the West Plaza retreat up the back corner stairs.

As the mob floods the entirety of the West Plaza, Capitol Police (who have, by now, been joined by MPDC) retreat into the door and up the narrow stair at the back corner at the south side of the plaza. They secure the door behind them, but in minutes it will be breached.

Video (note: the door cannot be seen from this angle, but at 50:49 you can see police disappearing around the corner - they are entering the door / stairwell):

The moment of alignment seems to occur off-screen, but the people in the video at about 52:16 seem to be just one or two steps ahead of the moment at the zero minute mark of the Parler footage. If we assume that actual alignment occurs at 52:14, then that moment is 14:38 Eastern. Because this video has clips, this timestamp is only functional for the 49:35- 53:13 minute marks. However the cuts do not appear to be very large, so it can be used in the adjacent clips, but with slightly larger error. Further cuts and clips have not been reviewed.

2:36pm - Police on the Lower West Terrace retreat into the Arch Entrance

As the mob has breached both the Upper Terrace and the West Plaza below, the Lower West Terrace becomes the last stronghold. But as protestors pour in from above, the police lines appear to be falling back into the Capitol itself via the Arch Entrance used by the incoming President during the Inauguration. By 2:41, the mob will have converged on this same entrance.

~2:39pm - Second Breach of the Central East Door

After an earlier partial door opening at 2:25 that was quickly closed again by police, the mob breaches the doors (per [this indictment](#), the doors appear to have been opened with assistance from a group on the inside).

When was the door breached again?

Both doors are opened again approximately 13m 43s after the door was first opened.

In [court documents](#) we found a screenshot depicting the approximate time the door was opened the second time with the timestamp 2:38:33pm. This screenshot appears to have been taken approximately 2 seconds after a girl with a bullhorn had chanted "We want Trump" one time which we have used to indicate the moment the door was opened (see [video](#) by Ford Fischer). Thus the door was opened at 2:38:31pm.

This video is also very helpful to watch for timing and shows a compilation of several videos: <https://www.youtube.com/watch?v=Mkm41FMH39g&t=38m>

Also of note: we had long suspected that the doors were opened with assistance from insurrectionists on the inside, which is what led us to research this door breach further. This indictment indicates that we were correct - several insurrectionists who were already in the building helped open the Central East Doors from the inside out:

2:41 - NW Side Door has been breached

I do not have a precise timestamp for the actual time of breach yet. The actual breach occurred when #CrowbarBeardGuy smashed one of the windows and reached in through the window to open the door via the handle on the inside. Seen [here](#).

The breach likely happened around 2:41pm. In a Parler timestamped 2:41:48, people can be seen [going in](#). Furthermore, in [this video](#) at the 3:13 minute mark, the time 2:40pm can be seen on a phone, and at the 4:22 minute marker people begin to cheer and point in the direction of the door. Though not shown on screen, this is likely when the door was breached. By the time the video pans back around, the door is open and people are going in.

Note that the NW Door was breached half an hour prior to this. I do not know if it is still accessible at 2:41pm or is now being barricaded by police.

2:41pm - The mob swarms the Arch Entrance Steps

The police having retreated into the Capitol just minutes before, the mob now swarms the Arch Entrance to the “Tunnel” on the Lower West Terrace. This is the same entrance used by incoming presidents during the inauguration ceremony.

This entrance will now become the focal point for a group of those involved in the Capitol siege. Despite the fact that many other entrances into the Capitol have already been breached, and the interior is swarming with insurrectionists, a dedicated group will persist in attempting to breach this particular entrance for the next two hours. This group of insurrectionists will be some of the very last holdouts before the entire Capitol is cleared by police.

The mob reaches the doors of the Speaker's Lobby. Rioters smash the windows, including #HelmetBoy who smashes one with a helmet. He has now been arrested. At 2:43 the security personnel in front of the door move aside. Presumably this may be because these are not armed officers. Reinforcements can be seen coming up the nearby stairs, so it is possible they were coming to relieve these security personnel.

At 2:44:46pm, Ashli Babbitt attempts to climb through one of the windows and is shot by a Capitol Police Officer (shown in the image above holding the gun). She later died of her injuries.

An unknown male directed, "You are executing citizen's arrest.

Arrest this assembly, we have probable cause for acts of treason, election fraud." Watkins responded, "We are in the mezzanine. We are in the main dome right now. We are rocking it. They are throwing grenades, they are fricking shooting people with

(<https://www.youtube.com/watch?v=cJOgGsC0G9U>): The 10:26 minute mark in this video aligns with the 2:41 minute mark in the L4AADY video (<https://jan6archive.com//youtube/L4AADYTHDTE.mp4>) which has a start time of 14:58:38 Eastern. As a reference point between the two videos, note the position of the hand of the man wiping his face with the white cap someone just handed him off the floor. This point of alignment means that this video begins at 14:50:53.

3:12pm - North Door Siege

While the police appear to have opened the door to push people out of the Capitol, others try to fight to get inside. The siege has not been sequenced yet, but it spanned from at least 3:12 until 4:34 when police cleared the area. This is a list of footage from that time:

As a reference, note the positioning of the man who grabs the police shield and pulls it, causing it to nearly hit people in the face. With this moment of alignment, the realtime at alignment is 15:22:32 Eastern. Other important moments of note - In this video at 1:25:10, #TunnelCommander tells everyone to sit down. Thus the real time of this

command is 15:23:03 Eastern. Another potentially important time to note is Michael Fanone's return to the police line after having been caught in the mob. This occurred at 1:24:31, so the realtime of this moment is 15:21:58 Eastern.

3:18:57pm - Officer Michael Fanone is dragged into the mob

As members of the mob stream out of the Inauguration Entrance Tunnel, Officer Michael Fanone appears to be grasped by at least two of the insurrectionists and dragged along with the mob toward the bottom of the steps. They taser him until he has a heart attack. He falls on the ground, his badge and ammunition stripped. People chant "Kill him with his own gun!"

Officer Michael Fanone's helmet can be spotted in the crowd at minute marker 22:57 of [Storming the Capitol](#), indicating a timestamp of 15:18:57 Eastern.

<https://archive.vn/KsiAb>

Timestamp Information:

At the 19:39 mark, this footage (<https://www.youtube.com/watch?v=rAKBMFMuJ-g&t=19m39s>) seems to align with the 1:23 minute mark of this Parler video (

<https://projects.propublica.org/parler-capitol-videos/?id=91y87HI97H1m>

) timestamped 15:14 Eastern. This would mean that the Storming the Capitol Video begins at 14:55:44. As a reference point, watch the line of men moving up the steps. Man in dark clothes, man in grey hood, man in tan jacket. The same order / position can be seen in both videos. Also, the blue flag is spread behind the #TunnelCommander in both. The Parler footage is from a great distance, but these markers still seem to pin it fairly well. Furthermore, two other calculations corroborate this: (1) Possible alignment: 14:50-16:29 could match up with (<https://www.pacificpressagency.com/preview/1300391>) which is timestamped 15:12:23. #TunnelComannder and Scarf in place, but at 15:46 the Shaggy Professor is coming down the steps and in the photo, he is standing sort of just below them.

Unfortunately it appears that the Shaggy Professor alignment occurs and Scarf is just lowering his flag right when the videographer is jolted and others the block view. We can't see area for a few seconds at about 16:07, right when it seems everything was about to be aligned to the photo. (2) On this video, SwedishScarf appears by the #TunnelCommander at 11:57 mark. On a Parler video timestamped 15:03 (<https://projects.propublica.org/parler-capitol-videos/?id=m70l1c9Vd77U>), swedish scarf is not next to the TunnelCommander by the arch. On a 15:10 video (<https://projects.propublica.org/parler-capitol-videos/?id=7ImZGTdfdcUK>) he is there, so the 11:57 mark on the Storming video is somewhere between 15:03 and 15:10 pm. Both these latter calculations corroborate the primary one.

Officer Michael Fanone's helmet can be spotted in the crowd at minute marker 22:57, indicating a timestamp of 15:18:57 Eastern.

3:40 - Police Leave the Building on the East Side, but doors are sealed behind them

Police are escorted out of the building through the main East Doors (Columbus Doors), after an apparent parley with the insurrectionists by one officer (shown here:

<https://www.youtube.com/watch?v=k4EFWNROkak&t=2m27s>) The officers walk down the steps on the east side of the building, the crowds parting for them as they exit. As they descend the steps, an insurrectionist says: "We have the building ... they're withdrawing; there's nobody else inside... we just extracted. These are the cops. The building's yours."

On the East steps, someone on a bullhorn screams "We were invited here by the President of the United States!" as if justifying the insurrection this way.

4:11pm (approx) - People breach the lower-right window panel in the window to the left of the Inauguration Tunnel Entrance

At some point between 4:10 and 4:12 (seemingly at 4:11 if indicated by the cheers of the crowd), a window on the Lower West Terrace is breached, giving people access to the room inside. The breach occurs in the lower-right panel of the window to the left of the Inauguration Tunnel Entrance. In footage by the Black Conservative Preacher (part 8 of his series), the window breach occurs sometime between the 0:40 mark when we see the window intact before the camera pans away, and the 1:40 mark when the camera pans back and people are going in through the window. It is unclear if the window was broken or

opened some other way. Shortly after breaking, some go in. #PurpleCamoKid emerges and signals that they can't get far into the interior this way as police will use lethal force.

Video of Window Breach Time Range - BCP Part 8: (we have not yet located footage of the actual breakage - and in fact it seemed that those filming this area directed their cameras away or shut them off when it occurred): <https://www.youtube.com/watch?v=koW5NYVIUz8&t=40s>

Video 2 (from 1:30 minute marker): This footage of #Windowbreaker attacking the upper window with his hatchet may or may not be related to the window breach. It is the same window as the one that was breached, but the upper panel. There is no timestamp for this video:

Timestamp for Window Breach:

At the 0:32 mark, this footage - Part 8 from the Black Conservative Preacher (<https://www.youtube.com/watch?v=koW5NYVIUz8>) seems to align with this photo by Lev Radin (<https://www.pacificpressagency.com/preview/1300767>) Accounting for the autumn time change, the photo has a timestamp of 16:10:08 Eastern. This would indicate that this footage starts at 16:09:36. Also of note: this is one of the last pieces of footage where we see Roseanne Boyland alive. She is on the steps at the 2:16 minute mark (16:11:52 Eastern). In this footage, the window breach occurs sometime between the 0:40 mark when we see the window intact before the camera pans away, and the 1:40 mark when the camera pans back and people are going in through the window. Therefore the realtime of this range is 4:10pm to 4:11pm.

4:12pm - Roseanne Boyland stands on the Arch Entrance Steps less than 20 minutes before she is trampled by the mob

At the 2:16 minute mark (4:11:52 Eastern), we catch a glimpse of Roseanne Boyland standing on the steps leading up the Arched Tunnel Entrance on the Lower West Terrace. Less than 20 minutes later, she will have been crushed by the mob attacking this entrance. She died on Jan 6 of injuries sustained in the siege.

~4:17pm - People inside the room adjacent the Tunnel Entrance say police are considering using lethal force

Minutes after the lower panel of the window to the left of the Tunnel Entrance was breached (see notes at 4:11pm), #RyanNichols crouches in the room inside this window and says to those outside that there are reports that officers may use lethal force on the mob.

#PurpleCamoKid leans in to communicate with those inside, listens to Nichols, then turns around and, looking at someone far off in the Lower West Terrace crowd, repeatedly makes a long gun firing gesture while shaking his head. He seems to be passing on the message that LEOs inside the building have expressed they will use lethal force if the mob tries to breach further in. 4:21 - 4:24pm: Mob Crush at the Inauguration Entrance Steps

Screenshot clipped from Lev Radin's Photo here:

<https://www.pacificpressagency.com/preview/1300285>

While video footage is spotty at this time, something has clearly gone terribly wrong for the insurrectionists on the Inauguration Entrance Steps. The mob, once surging against the police, have now fallen on top of one another in a tangled mass, tumbling down the stairwell. In many of the photos by Lev Radin at this time, you can see people screaming. When they finally disentangle themselves, we will find that the siege has claimed the life of another victim.

Photos by Lev Radin timestamped with the 2:21-2:24 time period: [\[1\]](#), [\[2\]](#), [\[3\]](#), [\[4\]](#)).

Can we find any clear footage of this time?

4:22pm - Police Clear the Central Upper West Terrace.

Just above the Lower West Terrace, on the Upper West Terrace, the police continue to try and regain control of the area, this time bisecting the crowd in two - pushing some back to the NW Steps, and the others toward the northern part of the Upper Terrace that wraps around to the North side of the building, and another exit point.

4:26pm - Trapped Behind Police Lines in the Inauguration Tunnel

Three fighters at the Inauguration Entrance have, by this point, become trapped in the tunnel behind police lines ([#WhiteDeathHoodie](#), [#BlackHatStripedBuff](#), and [#BlueJacketTunnelRescue](#)). If they remain there, they will almost certainly be taken into custody.

Now, even as people lie on the ground in a tangle, injured and in one case, dying, the attacks on police grow increasingly vicious - possibly orchestrated as a distraction so that the three trapped men can escape. Fighters brawl with police with fists and makeshift weapons. [#Fingerman](#) tries to wrestle a police baton out of the arms of an officer, knocking the officer down in the process. This officer is theorized to be Officer A Wayte, whose helmet [#Fingerman](#) later puts on.

[#LittleBrownBeard](#) is by the tunnel entrance, pointing down at something (possibly Rosanne Boyland), and mouthing something to someone in the distance - obviously he has connections here. In the melee,

#WhiteDeathHoodie -- one of the three insurrectionists trapped behind police lines -- escapes around the edge of the arch.

Roseanne Boyland, having been crushed by the mob in the Lower West Terrace Inauguration Entrance tunnel, now lies at the tunnel opening. Rioters climb over her and fall heavily on her as they continue to relentlessly attack the police line while her friend Justin Winchell in a teal jacket holds onto her and screams for others to help. He and others pull her out to the steps at 16:28:04 and allegedly perform CPR, but she will die of the injuries she sustained in the tunnel attack. Though no official time of death has been released, at the time of the footage shown below, she may in fact, already be dead.

Meanwhile, seemingly oblivious to the death they've just caused, many in the mob grow even more vicious. #Fingerman, #Scallops, and others brutally attack the police line. #Scallops strikes and stabs at officers with a crutch, then grabs Officer B.A. Miller and throws him to the ground. #OrangeNTeal, #CATSweat, and others drag Officer Miller down the steps where #Caveman beats him with an American flag wrapped around its flagpole. Several people (including the man with the navy shirt and gray hat pictured in the Reuters photo) come forward and help move the officer out of harm's way. Even as they do so, others in the mob try to yank the officer back, and #WhitePowerPuff punches him on the top of the head.

Nearby, #Slickback attempts to drag an officer down the steps (possibly Officer A. Wayte whose helmet we see #Fingerman pick up and put on - and possibly the source of the bodycam footage, as that officer appears to have lost their helmet). #Slickback ultimately gives up.

Timestamp Source: To arrive at the timestamp, we used the time-ticker in the bodycam footage & the following, which was done prior to bodycam footage release:

To calculate timestamp, I lined up the Video Storm Pt 9 from the Black Conservative Preacher (<https://www.youtube.com/watch?v=Zqh47NQrPU>) with a 16:27:06 timestamped image from Lev Radin (<https://www.pacificpressagency.com/preview/1300303>). The image appears to align with the 1:06 minute mark on the video (for reference points, look at the arm positions of #Slickback and #PippiLongScarf), which means the BCP video begins at 16:26, and the attack on Officer Miller at 4:27.

4:28ish* - Officer B.A. Miller moved by several in the crowd away from his attackers

Images: Reuters - <https://pictures.reuters.com/archive/USA-ELECTION-TRUMP-RC2M2L9M4LBK.html>

Several in the crowd move themselves near Officer Miller, circling him as they maneuver him through the crowd. The officer's body language suggests he may be dropping in and out of consciousness. The group moves him to an empty wheelchair lift. It is not entirely clear who was there to help and who was there to harm him further.

JRobertson - Long cut of the attack on and "rescue" of Officer Miller:

Need precise timestamp and additional description and footage URLs. Photographer Eric Lee has some still shots of this event.

4:28:14 pm - #BlackHatStripedBuff is pulled from the tunnel by an angry #LittleBrownBeard

While attacks on the police line continue, mere seconds after Rosanne Boyland is pulled from the Arch Entrance to the left side of the steps for CPR to allegedly be performed, #BlackHatStripedBuff (the last of the three insurrectionists caught behind the police line in the tunnel vestibule) seems to call from inside the vestibule “Help me!”

#LittleBrownBeard looks around the corner of the arch entrance, reaches out and yanks #BlackHatStripedBuff from the tunnel. #LittleBrownBeard appears to be furious at #BlackHatStripedBuff, and promptly cuffs him on the head, knocking off Striped Buff’s hat. He grabs him by the jacket and shoves him angrily down the steps.

It is possible that #LittleBrownBeard is so angry because the two of them are part of a coordinated siege -- and #BlackHatStripedBuff just narrowly escaped landing in police custody with his phone seemingly unlocked and livestreaming.

Video of Rescue (at the 1:17 minute mark):

<https://projects.propublica.org/parler-capitol-videos/?id=v7NT08ADJ2au>

Related but needs a proper timestamp

Video with audible “Help me!” heard at the 1:17:00 minute mark (approx 16:28 Eastern Time): <https://www.youtube.com/watch?v=iNFcdpZdkh0&t=4617s>

Timestamp notes: Minute mark 1:16:07 of this video (<https://www.youtube.com/watch?v=iNFcdpZdkh0&t=4617s>) aligns with the 0:0:59 minute mark of in the Black Conservative Preacher's The Storm Part 9 (<https://www.youtube.com/watch?v=Zqh47NQrPU>). As a reference point, notice the riot shield being thrown over #Scallops head. The BCP video Storm Part 9 was previously calculated to have a start time of 16:26:00 Eastern (see description of that calculation above). Due to cuts in the video, this timestamp will only be accurate from 1:16:06 until the 1:17:00 minute mark.

1:16:07 minute mark = 16:26:59 EST therefore 1:17:00 minute mark = 16:27:52 EST

4:29pm: Upper Panel of Window to Left of Tunnel Entrance is Broken
<https://projects.propublica.org/parler-capitol-videos/?id=rvK7XGPZ5mQ0>

4:30pm - Roseanne Boyland dragged back to the police line for medical assistance

In the aftermath of the fighting, we see someone being dragged back toward the police line from the left side of the arch. Blue jeans and gray shoes consistent with what Roseanne wore that day.

Video: <https://www.youtube.com/watch?v=Zqh47NQrPU&t=4m7s>

4:30ish and afterward - Many key people in the Inauguration Tunnel Entrance attack are dispersing

Though the crowd still lingers, some of the key players in the Tunnel attack are beginning to disperse.

At 4:29, #WhiteDeathHoodie, head down, and now disguised with a black vest over his white hoodie, exits the Lower West Terrace via the Mezzanine level, presumably headed to descend the NW Steps under the scaffolding (<https://www.youtube.com/watch?v=vTXOkcwYxvE&t=17m43s>).

A bit behind #WhiteDeathHoodie, #BlackGlove805 rinses his eyes out on the mezzanine (<https://www.youtube.com/watch?v=vTXOkcwYxvE&t=18m13s>), several people behind him, #RedSleevelessTattoos descends as well (<https://www.youtube.com/watch?v=vTXOkcwYxvE&t=18m55s>).

#OrangeHoodieRedHat departs around 4:54 (<https://projects.propublica.org/parler-capitol-videos/?id=rTWHRH2OzOhG>).

At about 5:04 #BullHornLady departs through a window, #Scallops departs as well. (https://d2hxnssq7ss7g.cloudfront.net/bRkfJIK7dHzC_cvt.mp4) .

4:53pm- Mob begins to smash media equipment in Media Pen NE (#MediaSmash)

After being pushed off the North Terrace by police, some of the mob converges on the Media Pen on the NE Lawn. They hurl abuse at the reporters and videographers there, knock down the barricades, and around 4:53pm, or shortly after, they appear to begin to smash media equipment. The timing of the beginning of the smash begins off-camera in this footage:

In the DLive Zykotic livestream (

Therefore the Zykotic livestream has a start time of 4:06:58pm. The #MediaSmash seems to begin (off-screen) at the 46:55 minute mark when the videographer says “oh yeah, they’re breaking it” which would correspond to a real-time of 4:53:53pm Eastern.
