

Of course. Here is a privacy policy for your extension.

Privacy Policy for Tumblr Media Scraper

Effective Date: July 30, 2025

This Privacy Policy describes how the "Tumblr Media Scraper" extension (the "Extension") handles your information. Your privacy is important to us, and we are committed to protecting it.

1. Information We Collect

The Extension is designed to function without collecting, storing, or transmitting any of your personal data.

- **Personal Information:** We do not collect any personally identifiable information (PII) such as your name, email address, or IP address. The core functionality of finding and downloading media is performed entirely on your local computer.
- **Browsing Data:** The Extension only interacts with the content of *.tumblr.com pages when you are actively using the site. It scans the page content locally on your browser to find media URLs (images, videos, GIFs). This information is not stored, logged, or sent to any remote server.
- **User Settings:** The Extension uses the chrome.storage permission to save your settings and preferences locally on your browser. This data is stored only on your computer and is not accessible by us.

2. How We Use Information

Since we do not collect personal information, we do not use it. The non-personal data (media URLs found on a page) is used solely for the Extension's core functionality:

- To display a preview of the media available for download.
- To initiate downloads of selected media to your computer when you click the download button.

3. Permissions Justification

The Extension requests the following permissions to operate correctly:

- scripting & host_permissions on *.tumblr.com: To find media files on the Tumblr webpage you are visiting.
- downloads: To save the media files you choose to download to your computer.
- tabs: To identify the active tab and ensure the extension functions on the correct page.
- storage: To save your preferences locally on your device.

4. Third-Party Services

This Extension does not integrate with any third-party services that would collect your data. All operations are self-contained within the Extension and your browser.

5. Data Security

All data processed by the Extension is handled locally on your computer. We do not have access to this data. The security of this data is therefore dependent on the security of your own computer and web browser.

6. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. Any changes will be reflected in the updated version of the Extension and on its Chrome Web Store page. We encourage you to review this policy periodically.

7. Contact Us
