Collen Masimirembwa is the founding President and Chief Scientific Officer of the African Institute of Biomedical Science and Technology, AiBST, www.aibst.com. He previously worked for AstraZeneca Pharmaceutical Company in Sweden for 10 years as a Principal Scientist in DMK & Bioanalytical Chemistry. With support from various funding organizations (ISP, EDCTP, CDC, TWAS, WHO, NIH, NEPAD/SANBIO), companies (AstraZeneca, Novartis, Merck) and colleagues in academia and industry, he established AiBST that focuses on drugs and diagnostics innovation. He is a Distinguished Professors of Health Sciences at the University of Witwatersrand. He is also a Fellow of the Zimbabwe Academy of Sciences (ZAS) and the African Academy of Sciences (AAS). Collen is a pioneer of pharmacogenetics research in Africa and continues to champion its development to clinical applications. One of his outstanding innovations is the precision medicine test, GenoPharm^{R}. He also runs an outreach program to promote biomedical sciences in high schools.
