MY BLUEPRINT PORTFOLIO MOMENT
UNIT 2

Looking back over the assignments and topics we have covered in this unit, choose the one that you most connect with. Which one had the most impact on you?

1. When you have identified it, find a piece of evidence that best represents it - it could be the assignment itself or a picture that Shows what it's all about.
2. Save that evidence into your My Blueprint portfolio 'CLE Mini-Capstone' that you created at the beginning of the semester.
3. Figure out which of the Core Competencies best fits with your evidence and tag it using the tags available.
4. In one sentence, explain why this evidence is so important to you.

NEW:
5. Start a portfolio for the rest of Grade 10.
6. Find a piece of evidence from each of your classes this year that you are most proud of and add it to your new portfolio.

When this is done, you will have created the second installment of your mini-capstone that you will be handing in at the end of the semester. By keeping up with each unit, a large part of your project will be completed before it is even assigned!

Evidence Collection: CLE

Evidence must be something you can see or experience that shows what you have been doing. It can be a picture, video, assignment, audio recording or a ***detailed*** explanation of an experience. Your evidence must show each of the following, demonstrating;
★ what you have learned,
★ what you are proud of,
★ where you are going.

Remember
● Each piece of evidence should have **Teacher Tags** included which are connected to the Provincially-outlined Core Competencies (see the link below for more information explaining what these are all about).
● Each piece of evidence should have a **2-3 sentence reflection** on what the evidence was from and why you feel it was important and meaningful. (see above example)
