

How to Clear Your Cache in Google Chrome

Many issues within the Chrome browser can easily be fixed by just clearing your cache. Here are the steps to do that:

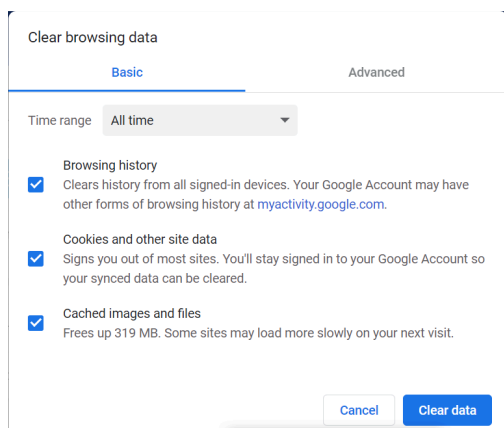

1. Click on the 3 dots in the top right corner of your browser window and select “History”

2. Now click on “Clear Browsing Data” on the left

3. For time range, make sure to select “All time”. Then check the boxes for “Browsing History,” “Cookies and other site data,” and “Cached images and files.” Click on “Clear Data”.

4. This may take a few minutes. Once it's complete, close your browser and restart your computer.
